One of the most significant industrial states in the country, with a powerful radical tradition, Pennsylvania was, by the early 1950s, the scene of some of the fiercest anti-Communist activism in the United States. Philip Jenkins examines the political and social impact of the Cold War across the state, tracing the Red Scare's reverberations in party politics, the labor movement, ethnic organizations, schools and universities, and religious

Organizations. Among Jenkins's most provocative findings is the revelation that, although their absolute numbers were not large, Communists were very well positioned in crucial Pennsylvania regions and constituencies, particularly in labor unions, the educational system, and major ethnic organizations. Instead of focusing on Pennsylvania's right-wing politicians (the sort represented nationally by Senator Joseph McCarthy), Jenkins emphasizes the anti-Communist activities of liberal politicians, labor leaders, and ethnic community figures who were terrified of Communist encroachments on their respective power bases. He also stresses the deep roots of the state's militant anti-Communism, which can be traced back at least into the 1930s.

This volume examines the origins and early years of the Cold War in the first comprehensive historical reexamination of the period. A team of leading scholars shows how the conflict evolved from the geopolitical, ideological, economic and sociopolitical environments of the two world wars and interwar period.

From its inception, the Conference on Security and Cooperation in Europe (CSCE) provoked controversy. Today it is widely regarded as having contributed to the end of the Cold War. Bringing together new and innovative research on the CSCE, this volume explores questions key to understanding the Cold War: What role did diplomats play in shaping the 1975 Helsinki Final Act? How did that agreement and the CSCE more

broadly shape societies in Europe and North America? And how did the CSCE and activists inspired by the Helsinki Final Act influence the end of the Cold War?

Ever since its first publication in 1992, *The End of History and the Last Man* has provoked controversy and debate. Francis Fukuyama's prescient analysis of religious fundamentalism, politics, scientific progress, ethical codes, and war is as essential for a world fighting fundamentalist terrorists as it was for the end of the Cold War. Now updated with a new afterword, *The End of History and the Last Man* is a modern classic.

The Cold War is conventionally regarded as a superpower conflict that dominated the shape of international relations between World War II and the fall of the Berlin Wall. Smaller powers had to adapt to a role as pawns in a strategic game of the superpowers, its course beyond their control. This edited volume offers a fresh interpretation of twentieth-century smaller European powers – East–West, neutral and non-aligned – and argues that their position vis-à-vis the superpowers often provided them with an opportunity rather than merely representing a constraint. Analysing the margins for manoeuvre of these smaller powers, the volume covers a wide array of themes, ranging from cultural to economic issues, energy to diplomacy and
