Honda GX series commercial grade engines are legendary. For reliable, easy-starting, fuel efficient performance, insist on a Honda GX Series Engine.

Honda Engines | GX Commercial Series Engines

The GX270 features more power, quieter performance, lower fuel consumption and lower emissions than the previous version. With new features and better performance, the new GX engines establish themselves yet again as the best engines in the business.

GX270 - Honda Engines

Yeah, just went thru that with a GX340 engine on my pressure washer - the thing acted like a fuel problem. It would start and run OK at idle, but under load it would run maybe 15-20 seconds and die - if I was quick enough, choking it would SOMETIMES keep it from dying. Checked the in-tank fuel filter, looked NEW. Pulled float bowl, flushed out everything with the nastiest carb cleaner I could ...

When it comes to their personal transportation, today's youth have shunned the large, heavy performance cars of their parents' generation and instead embraced what has become known as the "sport compact"--smaller, lightweight, modern sports cars of predominantly Japanese manufacture. These cars respond well to performance modifications due to their light weight and technology-laden, high-revving engines. And by far, the most sought-after and modified cars are the Hondas and Acuras of the mid-'80s to the present. An extremely popular method of improving vehicle performance is a process known as engine swapping. Engine swapping consists of removing a more powerful engine from a better-equipped or more modern vehicle and installing it into your own. It is one of the most efficient and affordable methods of improving your vehicle's performance. This book covers in detail all the most popular performance swaps for Honda Civic, Accord, and Prelude as well as the Acura Integra. It includes vital information on electrics, fit, and drivetrain

compatibility, design considerations, step-by-step instruction, and costs. This book is must-have for the Honda enthusiast.

This fully revised and updated edition is one of the most comprehensive references available to engine tuners and race engine builders. Bell covers all areas of engine operation, from air and fuel, through carburation, ignition, cylinders, camshafts and valves, exhaust systems and drive trains, to cooling and lubrication. Filled with new material on electronic fuel injection and computerised engine management systems. Every aspect of an engine's operation is explained and analyzed.

All what is dealing with electrical machines and electrical drives from theory to applications

Sidelined by an on the job injury, veteran paranormal investigator Maureen Keslyn reluctantly accepts an assignment at Shadow Valley Manor, an upscale retirement facility where someone--or something--is picking off residents and staff at a grisly clip. With her resources dwindling one death at a time and unnatural forces on the loose, Maureen's experience fighting the supernatural provides her only hope to destroy a clever and powerful evil before everybody in the manor--and the town--winds up dead. Together with a ragtag team that includes the local sheriff, the undertaker's daughter, and the facility cook whose knife skills in the kitchen could prove deadly out of it--Maureen is on a mission to bring rest to the weary, and peace

to the dead... "Paranormal thrills, a feisty middle-aged heroine, and a tantalizing mystery set in a creepy rest home . . . Clever, fast-paced, and fun." --Lisa Alber, author of Kilmoon and Whispers in the Mist.

First published in 1989 as Tuning New Generation Engines, this best-selling book has been fully updated to include the latest developments in four-stroke engine technology in the era of pollution controls, unleaded and low-lead petrol, and electronic management systems. It explains in non-technical language how modern engines can be modified for road and club competition use, with the emphasis on power and economy, and how electronic management systems and emission controls work.

What happened at 10 Rillington Place was so shocking and gruesome that even today everyone over a certain age still remembers the case with a shudder. In 1950, Timothy Evans was hanged for the violent murder of his baby daughter; he was also assumed to have murdered his wife. Then, less than three years later, another tenant, John Christie, was found to have killed at least six women, hiding their bodies in the garden, under floorboards and in a concealed kitchen alcove. Christie followed Evans to the gallows. It seemed unlikely that two murderers were living at 10 Rillington Place, and the evidence that emerged in the Christie case eventually led to Evans receiving a pardon. But there was also circumstantial evidence that Evans had indeed killed his wife and child. Crime student Edna Gammon firmly believes that

Evans was guilty. In *A House To Remember*, she explains why.

Albania provides a small amount of social assistance to nearly 20% of its population through a system which allows a degree of community discretion in determining distribution. This study investigates the poverty targeting of this program. It indicates that relative to other safety net programs in low income countries, social assistance in Albania is fairly well targeted to the poor.

The symposium will be a forum for exchanging experiences and presenting the latest developments in theory, design, research, diagnostics and the use of electrical machines. The following panels will take place during the Conference: 1 Electric machines theory, design and modeling, 2 New construction and technology of electric machines, 3 Electromechanical actuators, 4 Electric machines in propulsion systems, 5 Testing, monitoring and diagnostics of electrical machines and drives, 6 Electrical machines for electricity generation systems, 7 Electrical Machines and Drives Teaching Problems, 8 Workshop for PhD students.
