and against physicalism - the view that consciousness is entirely physical - and the several levels of debate surrounding those arguments. The dialogue takes place in a university library, after hours, where the two protagonists, impoverished graduate students Tollens and Ponens, sleep in lieu of proper accommodations. Through the course of five nights and a Saturday morning, they quote key passages from classic and contemporary texts while discussing the major theories on the subject: Frank Jackson's knowledge argument, philosophical "zombies," the inverted spectrum, epiphenomenalism, neutral monism, panpsychism, the problem of mental causation, the ability hypothesis, the phenomenal concept strategy, and more. The dialogue ends with the students contemplating the merits and drawbacks of modern physicalist views and non-physicalist alternatives. While *A Dialogue on Consciousness* is an entertaining and accessible introduction to some of the most complicated issues in contemporary philosophy, it does not forego rigor. Arguments and responses are precisely formulated and discussed in non-technical terms. Positions are considered with the care that they receive in professional literature. An expansive, categorized and annotated Reading Suggestions list is included at the end of the book to direct readers to the most relevant and helpful primary sources. Ideal for courses on the philosophy of mind and on consciousness, the book provides a thorough, up-to-date orientation to the debate about consciousness and physicalism.

John Perry revisits the cast of characters of his classic *A Dialogue on Personal Identity and Immortality* in this absorbing dialogue on consciousness. Cartesian dualism, property dualism, materialism, the problem of other minds . . . Gretchen Weirob and her friends tackle these topics and more in a dialogue that exemplifies the subtleties and intricacies of philosophical reflection. Once again, Perry's ability to use straightforward language to discuss complex issues combines with his mastery of the dialogue form.

Dialogue was written after reading Seth, the Conversations with God books, Edgar Cayce, Kryon, and listening to Esther Hicks. The very deepest questions concerning the origin of the universe, time, and consciousness were never answered to my satisfaction. So I decided to ask them. Astonishingly, just like Neale Donald Walsch, I too began to receive answers! These answers came almost instantaneously in what I call a "packet." These packets were like information on a data network, except that they were always accompanied by a feeling of profound certainty and well-being. I might have to spend 20 or 30 minutes deciphering the information in these packets, and typing the out. Then I'd read them over and sometimes ai couldn't believe what I had written. This book contains answers to questions like What is the origin of the universe? What is consciousness? What is the Higher Self? What is Memory? What is Time? as well as answers to questions of politics, sex, the law of attraction, and crop circles.

"The Consciousness Revolution is an extraordinary discussion among three of the very finest minds of our time, spirited in its exchange, compassionate in its embrace, brilliant in its clarion call to awaken our conscience and consciousness." Ken Wilber, author of Sex, Ecology, Spirituality and One Taste

All forms of psychotherapy deal with the limitations of our awareness. We have limited knowledge of our creative potential, of the details of our own behaviour, of our everyday emotional states, of what motivates us, and of the many factors within and around us which influence the decisions we make and the ways we act. Some therapists, especially those influenced by Freud and Jung, speak of the

'unconscious', giving the unintended impression that it is a kind of realm or domain of activity. Others, reacting against the specifics of Freudian theory, shun the word 'unconscious' altogether. However, so limited is the reach of everyday awareness and such is the range of unconscious factors, that one way or another these limitations must somehow be spoken about, sometimes in metaphor, sometimes more explicitly. This book offers a broad survey of psychotherapy discourses, including: The psychoanalytic The interpersonal The experiential The cognitive-behavioural The transpersonal This book offers a comprehensive overview of the ways in which these discourses employ a rich variety of concepts to address the limits of our everyday consciousness. Conscious and Unconscious is invaluable reading for all those interested in counselling and psychotherapy, including those in training, as well as for experienced therapists.

Bohm explores the purpose, methods, and meanings of the multi-faceted process he refers to simply as "dialogue." He offers tools that facilitate a true exchange of ideas between people.

Consciousness and Physicalism: A Defense of a Research Program explores the nature of consciousness and its place in the world, offering a revisionist account of what it means to say that consciousness is nothing over and above the physical. By synthesizing work in the philosophy of mind, metaphysics, and philosophy of science from the last twenty years and forging a dialogue with contemporary research in the empirical sciences of the mind, Andreas Elpidorou and Guy Dove advance and defend a novel formulation of physicalism. Although physicalism has been traditionally understood to be a metaphysical thesis, Elpidorou and Dove argue that there is an alternative and indeed preferable understanding of physicalism that both renders physicalism a scientifically informed explanatory project and allows us to

make important progress in addressing the ontological problem of consciousness. Physicalism, Elpidorou and Dove hold, is best viewed not as a thesis (metaphysical or otherwise) but as an interdisciplinary research program that aims to compositionally explain all natural phenomena that are central to our understanding of our place in nature. Consciousness and Physicalism is replete with philosophical arguments and informed, through and through, by findings in many areas of scientific research. It advances the debate regarding the ontological status of consciousness. It will interest students and scholars in philosophy of mind, metaphysics, philosophy of cognitive science, and philosophy of science. And it will challenge both foes and friends of physicalism.

Never before has there been a greater need for deeper listening and more open communication to cope with the complex problems facing our organizations, businesses and societies. Renowned scientist David Bohm believed there was a better way for humanity to discover meaning and to achieve harmony. He identified creative dialogue, a sharing of assumptions and understanding, as a means by which the individual, and society as a whole, can learn more about themselves and others, and achieve a renewed sense of purpose.

Group learning plays a central role in contemporary education and training. Studying collaboratively has been shown to directly enhance student learning, as well as being valued as a 'key skill'. This handbook covers the essential elements of groupwork in adult and post-compulsory education, in an accessible and practical format. It discusses the principles underpinning groupwork, looking at origins and developments in the field, and delves into the technical aspects of group development and the dynamics involved in working groups, drawing on key theoretical perspectives and embedding them in

Have you ever thought about how self-consciousness (self-awareness) originated in the universe? Understanding consciousness is one of the toughest "nuts to crack." In recent years, scientists and philosophers have attempted to provide an answer to this mystery. The reason for this is simply because it cannot be confined to solely a materialistic interpretation of the world. Some scientific materialists have suggested that consciousness is merely an illusion in order to insulate their worldviews. Yet, consciousness is the most fundamental thing we know, even more so than the external world since we require it to perceive or think about anything. Without it, reasoning would be impossible. Dr. Scott Ventureyra, in this ground-breaking book, explores the idea of the Christian God and Creation in order to tackle this most difficult question. He demonstrates that theology has something significant to offer in reflection of how consciousness originated in the universe. He also makes a modest claim that the Christian conception of God and Creation provide a plausible account for the origin of self-consciousness. He integrates philosophy, theology, and science in an innovative way to embark on this exploration.
