The overcurrent relay REJ 523 is intended for selective short-circuit protection in medium voltage distribution networks but can also be used for protection of generators, motors and transformers. The REJ 523 is based on a microprocessor environment. A self-s upervision system continuously monitors the operation of the relay.

About this manual This manual provides basic information on the protection relay REF 610 and presents detailed instructions on how to use the Human-Machine Interface (HMI) of the relay, also known as the Man-Machine Interface (MMI). In addition to the instructive part, a short chapter on commissioning and maintenance of the relay is included.
