LLB Law and Accounting & Finance (MN14) is a joint honours degree scheme that covers two stimulating, challenging and complimentary disciplines. You will be taught across two departments: the Law & Criminology Department, the oldest and most established department of its kind in Wales and Aberystwyth Business School, made up of staff that have a wide range of expertise, technical skills and real-world business experience.

This product provides a well-rounded summary of the relevant accounting areas from basic financial statements to complex earnings-per-share ratios and corporate finance and valuation. Learn how to recognize revenue, expenses, assets, and liabilities. It reviews accounting principles for many different areas, including acquisitions, investments, long-term debt, leases, stocks, and partnerships. It also discusses recent developments such as adoption of new requirements to place most operating leases on the lessee's balance sheet, a new principles based approach to accounting for revenue, and refinements in the accounting for stock options.

The need for an understanding of accounting is now even more critical than ever for lawyers practicing in many areas including securities and corporate law and litigation. In addition, over the last several years, the Financial Accounting Standards Board has made some landmark changes in the accounting rules in areas of interest to lawyers, including the accounting for mergers and acquisitions. The Second Edition of Accounting and Finance For Lawyers includes important material on such areas as accounting for stock options and derivatives and the elimination of the pooling of interests method of accounting for acquisitions. There is a discussion of the accounting implications of the use of so-called special purpose entities. Finally, a chapter on international accounting issues reflects the increasing globalization of business and accounting. As in the First Edition, the basic building blocks of accounting are covered so that the material is accessible and useful to those with any level of accounting knowledge.

Accounting and Corporate Finance for Lawyers introduces law students to the fundamental concepts of accounting and corporate finance. Students learn how to read and understand financial statements and footnotes, assess a company ' s financial position, and evaluate financial provisions and covenants in contracts. This book begins preparing students for success in the practice of law by providing the critical foundation of understanding accounting concepts and principles and the language of business people. Professors and students will benefit from: A reader-friendly organization and style Discussion and examples of how the principles are applied in practice Examples and exhibits that supplement the substance Exercises and problems designed to build a student ' s knowledge base

The principles of accounting and finance directly extend to contract issues, torts, business and securities matters, taxation issues, partnership disputes, gift and estate matters, to name only a partial list. These areas of jurisprudence are often based significantly on substantive financial questions, and their measurement can be the heart of the entire matter. The application of broad accounting principles to countless business transactions requires an understanding of the objectives of financial reporting and the needs of the users of financial information. Contrary to popular belief, accounting is not a mathematical formula or calculation, but rather an organized system that logically summarizes business transactions into useable information that is meaningful to management, creditors, business investors and other stakeholders. This text takes readers through the system of accounting and the development of financial statements. Complexities and limitations of accounting information are explored, culminating in a study of ratio analysis of financial statements to glean relevant insights. The objective of this introductory study of accounting is to provide a broad, workable knowledge base that will facilitate the use of accounting information as it relates to the practice of law.

This title provides expert explanation and a detailed outline of accounting and finance for lawyers, including exam tips and practice questions. The topics covered in this outline include basic accounting principles, definitions of accounting terms, balance sheet, and income statement. Other topics that are covered are statement of changes in financial position, consolidated financial statements, accumulation of financial data, and financial statement analysis.
