received letters that were intentionally contaminated with anthrax bacteria.

Biological Emergencies: Anthrax - NYC Health

Bioterrorism is the deliberate release of viruses, bacteria, toxins, or other agents to cause illness or death in people, animals, or plants. According to experts, the threat of global bioterrorism is increasing. In October 2001, bioterrorism became a reality when letters containing powdered anthrax were sent through the U.S. Postal Service. The attack caused 22 cases of illness, 5 of which resulted in death, and widespread fear.
