Of all of the countries profiled in the book, South Korea is the one Sharma seems to be betting will be the breakout. While many nations in Europe are going through a downturn, Poland and the Czech Republic are quiet standouts, in large part because they have paid attention to the fundamentals of a good economy, including putting money away to make strategic public investments.

Unexpected countries such as Turkey, Sri Lanka and Indonesia are following successful development paths and Sharma is quite happy to evaluate the sociological background to their policies. In 1948 Sri Lanka received a British ex colonial favoured Tamil immigrant minority elite dominating the Sinhalese majority.

An columnist and investor in emerging markets discusses how the global economy will be shaped in the future by focusing on Nigeria, Indonesia and Poland instead of the superstars of the last decade, China, Russia and Brazil.

International Bestseller One of Foreign Policy's "21 Books to Read in 2012" A Publishers Weekly Top 10 Business Book "The best book on global economic trends I've read in a while."—Fareed Zakaria, CNN GPS To identify the economic stars of the future we should abandon the habit of extrapolating from the recent past and lumping wildly diverse countries together. We need to remember that sustained economic success is a rare phenomenon. After years of rapid growth, the most celebrated emerging markets—Brazil, Russia, India, and China—are about to slow down. Which countries will rise to challenge them? In his best-selling book, writer and investor Ruchir Sharma identifies which countries are most likely to leap ahead and why, drawing insights from time spent on the ground and detailed demographic, political, and economic analysis. With a new chapter on America's future economic prospects, Breakout Nations offers a captivating picture of the shifting balance of global economic power among emerging nations and the West.

'The old rule of forecasting was to make as many forecasts as possible and publicise the ones you got right. The new rule is to forecast so far in the future, no one will know you got it wrong.' Ruchir Sharma does neither. In Breakout Nations he shows why the economic 'mania' of the twenty-first century, with its unshakeable faith in the power of emerging markets - especially China - to continue growing at the astoundingly rapid and uniform pace of the last decade, is wrong. The next economic success stories will not be where we think they are. In this provocative new book, Sharma analyses why the basic laws of economic gravity (such as the law of large numbers, which says that the richer you are the harder it is to grow your wealth at a rapid pace) are already pulling China, Russia, Brazil and other vast emerging markets back to earth. To understand which nations will thrive and which will falter in a world reshaped by slower growth, it is time to start looking at the emerging markets as individual cases. Sharma argues that we must abandon our current obsession with global macro trends and the fad for all-embracing theories. He offers instead a more discerning, nuanced view, identifying specific factors

- economic, political, social - which will make for slow or fast growth. Spending much of his professional life travelling in these countries as Head of Emerging Markets at Morgan Stanley, Sharma is uniquely placed to present a first-hand insider's account of these new markets and the changes they are undergoing. As the years of unbelievably swift growth draw to their close, this book shows us how it is time for both investors and economists to halt their blind thrust towards an impossible future.

The 10 Rules of Successful Nations offers a pithy guide to real-world economics, adapted from the New York Times bestseller *The Rise and Fall of Nations*. A wake-up call to economists who failed to foresee every recent crisis, including the cataclysm of 2008, *The 10 Rules of Successful Nations* is a slim primer full of pioneering insights on the political, economic, and social habits of successful nations. Distilled from Sharma's quarter century traveling the world as a writer and investor, his rules challenge conventional textbook thinking on what matters—and what doesn't—for a strong economy. He shows why successful nations embrace robots and immigrants, prefer democratic leaders to autocrats, elect charismatic reformers over technocrats, and pay no mind to the debate about big versus small government. He explains why rising stock prices matter as much or more than food prices, which measure of debt is the best predictor of economic crises, and why no one number can accurately capture the value of a currency. He also demonstrates how a close reading of the Forbes billionaire lists can offer the clearest real-time warning of populist revolts against the wealthy. Updated with brand-new data, *10 Rules* reimagines economics as a practical art, giving general readers as well as political and business leaders a quick guide to the most important forces that shape a nation's future.

The crisis of 2008 ended the illusion of a golden era in which many people imagined that prosperity and political calm would continue to spread indefinitely. In a world now racked by slowing growth and mounting unrest, how can we discern which nations will thrive and which will fail? Shaped by prize-winning author Ruchir Sharma's twenty-five years travelling the world, *The Rise and Fall of Nations* rethinks economics as a practical art. By narrowing down the thousands of factors that can shape a country's future, it spells out ten clear rules for identifying the next big winners and losers in the global economy. Each rule looks at a nation's political, economic, and social conditions in real time to filter out the hype and noise. He shows, for example, how slow population growth is eroding economic growth, and ranks nations by how well they respond. He describes the way cycles of political complacency and revolt fuel economic booms and busts. Amid growing tensions over inequality, he demonstrates how billionaire lists yield clues to which economies are most or least threatened by extreme wealth. In a period when the world is struggling with trillions of dollars in new debt, he explains which nations are most likely to avert this threat or buckle under it. Sharma's rules are based on the data he has collected over many years at Morgan Stanley Investment Management in New York, where he is now Head of Emerging Markets and Chief Global Strategist. This is a book of original research, not mere opinion. The final chapter takes the reader on a surprising world tour of the likely winners and losers in the near future. *The Rise and Fall of Nations* is enlivened by Sharma's stories from the road and his encounters with presidents, tycoons, and villagers from Rio to Beijing. It is a pioneering field guide to understanding our impermanent world.

For two decades bestselling author Ruchir Sharma has chased election campaigns across every major state in India, travelling the equivalent of a lap around the Earth. *Democracy in India* takes readers on a rollicking ride with Ruchir and his band of highly-informed fellow writers as they talk to farmers, shopkeepers and CEOs from Rajasthan to Tamil Nadu, and to interview leaders from Narendra Modi to Rahul Gandhi. No other book takes readers so close to the action, or traced the arc of modern Indian politics so immediately. Offering an intimate view inside the lives and minds of India's political giants and its people, Sharma explains how the complex forces of family, caste and community, economics and development, money and corruption, Bollywood and Godmen, have conspired to elect and topple Indian leaders since Indira Gandhi.

Where are the next decade's greatest investment opportunities? Veteran investor Marko Dimitrijevic argues that they can be found in frontier markets, which account for seventy-one of the world's seventy-five fastest-growing economies and 19 percent of the world's GDP. Yet many investors ignore them. Fueled by new access to technology and information, frontier markets are emerging even faster than their predecessors, making them an essential component of a globally diversified portfolio. In *Frontier Investor*, Dimitrijevic shows through colorful case studies, compelling charts, and fascinating travel anecdotes that it is not only possible but prudent to invest in these unfamiliar and undervalued options. Dimitrijevic explains how frontier markets such as Nigeria, Panama, and Bangladesh are poised to follow the similar paths of Chinese, Indian, and Russian markets, which were considered exotic two decades ago. He details a strategy for how and where to invest, directly or indirectly, to profit from frontier growth. Dimitrijevic covers the risks, political and otherwise, of these markets, the megatrends that promise exciting investment opportunities in the coming years, and the prospects for countries beyond the frontier, including Myanmar, Cuba, and even Iran. Rich with experience and insight, *Frontier Investor* opens up a whole new world—and worldview—to investors.

This short primer distils Ruchir Sharma's decades of global analytic experience into ten rules for identifying nations that are poised to take off or crash. A wake-up call to economists who failed to foresee every recent crisis, including the cataclysm of 2008, *10 Rules* is full of insights on signs of political, economic, and social change. Sharma explains, for example, why autocrats are bad for the economy; robots are a blessing, not a curse; and consumer prices don't tell you all you need to know about inflation. He shows how currency crises begin with the flight of knowledgeable locals, not evil foreigners; how debt crises start in private companies, not government; and why the best news for any country is none at all. Rethinking economics as a practical art, *10 Rules* is a must-read for business, political and academic leaders who want to understand the most important forces that shape a nation's future.

Selected as one of Motley Fool's "5 Great Books You Should Read" Advice on managing your wealth from bestselling author Bill Bonner From trusted New York Times bestselling author Bill Bonner comes a radical new way to look at family money and a practical, actionable guide to getting and maintaining multigenerational wealth. *Family Fortunes: How to Build Family*

Wealth and Hold on to It for 100 Years is packed with useful information, interwoven with Bonner's stories about his own family's wealth philosophy and practices. A comprehensive guide that shows how families can successfully preserve their estates by ignoring most of what people think they know about "the rich" and, instead, training and motivating all family members to work together toward a very uncommon goal. This book is a must-read for all individual investors—even those who do not plan to leave money to their children—because it challenges many of the most ubiquitous principles and rules of investing. You might expect a book on family wealth to be extremely conservative in its outlook. Instead, the Bonners announce what is practically a revolutionary manifesto. They explain: Why family money should NOT be invested in "safe, conservative" investments Why charitable giving is usually a waste of money, or worse Why it is NOT a good idea to let children go their own way Why you can't trust wealth "professionals" and why you should never entrust your money to money managers Why giving your children as much education as possible is NOT a good idea Why Warren Buffett and the rest of the rich people asking for higher tax rates are wrong to take "the pledge" Why Wall Street is a graveyard for capital, why most celebrity CEOs are a threat to the businesses they run, why modern capitalism is a failure, and more You will come away with a very different idea as to what family wealth is all about. It is not stodgy. Not boring. Not moss-backed and reactionary. On the contrary, it is the most dynamic, forward-looking capital in the world. The essential guide to passing wealth from one generation to the next, Family Fortunes is filled with concrete, practical advice you can put to use right away.
