The BSA Bantam is a two-stroke unit construction motorcycle that was produced by the Birmingham Small Arms Company (BSA) from 1948 (as a 125 cc) until 1971 (as a 175 cc). Exact production figures are unknown, but it was over 250,000 [citation needed] and some estimates place the number closer to half a million. [citation needed]

The bantam requires that amount of oil to remain lubricated, it is an agricultural engine compared to modern 2 strokes where lubrication is so well controlled. The debates on mixtures are interesting but rather unnecessary on an engine with such a limited power output, Ok for the bantam racer/trials lads I suppose.

Bantam D1 BSA Bantam D3 148cc two-stroke motorcycle Bantam D7 D1. The D1 (the original model) 125cc was available initially only with a rigid rear suspension, although within three years the range was enhanced to include an optional plunger rear suspension. The front suspension of all D1's possessed no damping and resulted in a bouncy ride quality.

BSA D14 Bantam engine restoration Part 1 of 10 is fitting all the bearings and oil seals to the crank cases also removing and fitting new phosfor bronze bush...

Year-by-year evolution of the BSA Bantam, a simple commuter bike that thousands learnt to ride on. It became the standard GPO 'telegram bike' in the 1950s and was a huge success, with 100,000 built in the first four years of production. It's a story with interesting asides, like the Hummer, Harley-Davidson's version of the DKW that inspired the Bantam, and survived into the 1960s. But it's a sad story too – BSA failed to follow up the Bantam's early success by developing it, and by the mid-1960s it was looking outdated, especially next to the new breed of four-stroke Hondas. That the Bantam was allowed to fizzle out in 1971 symbolised the state of the industry that produced it, but today there's a thriving community of Bantam owner/riders. The book ends with a guide to buying a secondhand Bantam, along with useful appendices on specifications, engine/frame numbers, and contacts among the clubs and Bantam specialists. Every Bantam owner, or would be owner, needs this book - the Bantam Bible!

BSA Bantam is the most numerous and popular small classic British bike on the market. 100 photos illustrate this practical, straightforward guide to buying a secondhand BSA Bantam.

128 pages, 64 black & white illustrations, size 5.5 x 8.5 inches. Originally published under the title The Book of the BSA Bantam by W. C. Haycraft, this book is one of The Motorcyclist's Library series published in the USA by Floyd Clymer by arrangement with the original publishers Pitman Ltd. of London, England. It includes complete technical data, service and maintenance information and detailed instructions for the repair and overhaul of the major mechanical and electrical components for all models of the BSA Bantam constructed from 1948 onwards. There is adequate detailed text and diagrams to assist in major refurbishing such as an engine rebuild or even a complete renovation. Applicable to all 125cc and 175cc BSA Bantams including the following touring models: D1, D3, D5, D7, D7D/L, D10, D14, D14/4 & Bantam 175, it is also applicable to the same series of competition models. This publication has been Out-of-print and unavailable for many years and is becoming increasingly more difficult to find on the secondary market and we are pleased to be able to offer this reproduction as a service to all BSA enthusiasts worldwide.

Engine-tuning expert A. Graham Bell steers you through the various modifications that can be made to coax maximum useable power output and mechanical reliability from your two-stroke. Fully revised with the latest information on all areas of engine operation, from air and fuel, through carburation, ignition, cylinders, porting, reed and rotary valves, and exhaust systems to cooling and lubrication, dyno tuning and gearing.

The BSA and Triumph motorcycles designed for the 1971 model year, including Ariel 3 and the 750cc Triumph Hurricanel. A study of related promotional and racing events, the US organisation, and BSA's financial position prior to 1971's devastating trading loss announcement.

Betty and Nancy Debenham were a pair of young adventurous lady motorcyclists who entered trials competitions on equal terms with men in the 1920's. Although they were serious motorcyclists they never let this get in the way of their tremendous sense of fun. Their spirit shines through in 'Motor Cycling for Women'. A practical and yet at times eccentric and quirky book from a bye-gone era that will make you smile.

Full history of BSAs world famous Gold Star mode and many other wonderful models.
