Charlie Joe Jackson, the most reluctant reader ever born, made it his mission in the first book to get through middle school without reading a single book from cover to cover. Now he's back, and trying desperately to get straight A's in order to avoid going to academic camp for the summer. In order to do this, he will have to betray his friend, lose the girl of his dreams, and end up acting in a school play about the inventor of paper towels. Charlie Joe's not exactly the "school play kind of guy", but desperate times call for desperate measures.

Each book in the Daily Warm-Ups: Reading series provides students with over 150 opportunities to master important reading skills. The warm-ups include both fiction and nonfiction reading passages, followed by questions that are based on Bloom's Taxonomy to allow for higher-level thinking skills. Book jacket.

"This workbook will introduce your child to grade six vocabulary and reading comprehension exercises in a step-by-step manner."--Cover.

Going behind the scenes of an armored cavalry regiment, an insider's view includes photographs, illustrations, and diagrams of tanks, helicopters, and artillery systems, interviews with high-ranking officers, and future roles the armored cavalry might play. Original.

OGT Exit Level Writing provides real examples of student writing on tests similar to the Ohio Graduation Test for practice. Students create their own methods of evaluation for their writing and learn valuable tips on how to write compositions for all testing situations. This book is suitable for students in all states who will take writing tests as part of academic requirements.

Practical, engaging guide to helping early childhood educators understand and address the needs of English language learners.

Endophthalmitis is a serious eye infection that can cause blindness if not promptly diagnosed and appropriately treated. The goals of this book are to provide the latest information about endophthalmitis and offer recommendations for diagnosis and treatment. Each chapter is written by experts in the field with the practicing clinician in mind. Several chapters focus on the major types of endophthalmitis such as postoperative, post-intravitreal injection, bleb-related, exogenous fungal, chronic, and endogenous endophthalmitis. Other chapters describe endophthalmitis in special populations such as diabetic or immunocompromised hosts or those with a glaucoma drainage device, keratoprosthesis, or other artificial implant. Also included are chapters that provide an overview of endophthalmitis as seen around the world, summarize current understanding of endophthalmitis pathogenesis, describe the latest microbiologic and molecular diagnostic techniques, and discuss emerging problems such as multidrug-resistant pathogens. A final chapter offers recommendations for ways to prevent this devastating eye infection.
