The photos in this edition are black and white. Mitsubishi's 4G63t engine is among the most powerful engines ever in the sport-compact world. It's not uncommon to find one of these four-cylinder, iron-block, aluminum-headed, 2-liter turbocharged monsters making more than 1,000 horsepower with the right modifications and tuning - well above the 200-300 hp produced in the factory-made engines. Bolted into such cars as the Mitsubishi Lancer Evolution, Eclipse, and Galant, and the Eagle Talon and Plymouth Laser, the 4G63t has more than a cult following among sport-compact enthusiasts, who know and respect this engine's immense performance potential at the track or on the street. Up until now, in-depth performance information on the 4G63t has been hard to find. For this book, author Robert Bowen went straight to the source, Robert Garcia of Road/Race Engineering in Santa Fe Springs, California. RRE is the most well-known and respected Mitsubishi turbo performance shop in the United States, and Garcia is its in-house engine builder. Mitsubishi enthusiasts will benefit from Garcia's expertise and be able to build better, stronger engines than ever before. "How to Build Max-Performance Mitsubishi 4G63t Engines" covers every system and component of the engine, including the turbocharger system

and engine management. More than just a collection of tips and tricks, this book includes a complete history of the engine and its evolution, an identification guide, and advice for choosing engine components and other parts. Profiles of successful built-up engines show the reader examples of what works, and the book includes helpful guidance for choosing your own engine building path.

The ultimate performance guide for modifying one of the hottest sport compacts on the street today. From the editor of Honda Tuning comes a comprehensive tuning guide to maximize the power and handling of the Mitsubishi DSM for street and strip action. Not only does it cover such different names as Mitsubishi Eclipse, Eagle Talon, and Plymouth Laser, it also includes all makes and models from 1990 to 1999.

The acclaimed bestseller that's teaching the world about the power of mass collaboration. Translated into more than twenty languages and named one of the best business books of the year by reviewers around the world, Wikinomics has become essential reading for business people everywhere. It explains how mass collaboration is happening not just at Web sites like Wikipedia and YouTube, but at traditional companies that have embraced technology to breathe new life into their enterprises. This national bestseller reveals the nuances that drive wikinomics, and share fascinating stories of how masses of people (both paid and volunteer) are now creating TV news stories, sequencing the human genome, remixing their favorite music, designing software, finding cures for diseases, editing school texts, inventing new cosmetics, and even building motorcycles.

The definitive international history of one of the world's most successful rally cars. Covers every Lancer model - including all special editions, and Dodge, Colt, Plymouth, Valiant, Eagle, Proton and Hyundai variants - from 1973 to date. Includes a Foreword by Shinichi Kurihara, Mitsubishi's Evo team leader.

In early 1920 in Hawaii, Japanese sugar cane workers, faced with spiraling living expenses, defiantly struck for a wage increase to \$1.25 per day. The event shook the traditional power structure in Hawaii and, as Masayo Duus demonstrates in this book, had consequences reaching all the way up to the eve of World War II. By the end of World War I, the Hawaiian Islands had become what a Japanese guidebook called a "Japanese village in the Pacific," with Japanese immigrant workers making up nearly half the work force on the Hawaiian sugar plantations. Although the strikers eventually capitulated, the Hawaiian territorial government, working closely with the planters, cracked down on the strike leaders, bringing them to trial for an alleged conspiracy to dynamite the house of a plantation official. And to end dependence on Japanese immigrant labor, the planters lobbied hard in Washington to lift restrictions on the immigration of Chinese workers. Placing the event in the context of immigration history as well as diplomatic history, Duus argues that the clash between the immigrant Japanese workers and the Hawaiian oligarchs deepened the mutual suspicion between the Japanese and United States governments. Eventually, she demonstrates, this suspicion led to the passage of the so-called Japanese Exclusion Act of 1924, an event that cast a long shadow into the future. Drawing on both Japanese- and English-language materials, including important unpublished trial documents, this richly detailed

narrative focuses on the key actors in the strike. Its dramatic conclusions will have broad implications for further research in Asian American studies, labor history, and immigration history.
