14. The Human Genome

The human genome includes tens of thousands of genes.

In 2003, the DNA sequence of the human genome was published. In a few cases, biologists were able to identify genes that directly control a single human trait such as blood type.

14 The Human Genome

1 source: yumpu.com.  
We do not have an idea as to how many human cells there are.

Section 1  
Hereditary  
Answer Key  
Pages 344-346  
Scientists estimate it to be anywhere from three billion to ten billion. Although this is all guesswork, it's very possible that there are billions of cells in your body.
