Endorsed by Cambridge International Examinations Covers the entire syllabus for Cambridge International Examinations' International AS and A Level Chemistry (9701). It is divided into separate sections for AS and A Level making it ideal for students studying both the AS and the A Level and also those taking the AS examinations at the end of their first year. - Explains difficult concepts using language that is appropriate for students around the world - Provides practice throughout the course with carefully selected past paper questions at the end of each chapter

Includes list of members, 1882-1902 and proceedings of the annual meetings and various supplements.

The Near East and North Africa Regional Overview of Food Security and Nutrition provides new evidence for monitoring trends in food security and nutrition within the framework of the 2030 Sustainable Development Agenda. The in-depth analysis of progress made against Sustainable Development Goal 2 Target 2.1 (to end hunger and ensure access to food by all) and Target 2.2 (to end all forms of malnutrition), as well as the state of micronutrient deficiencies, is complemented by a review on rural transformation policies aimed at addressing food insecurity and nutrition issues. Updated estimates shows that the food security situation on the region continues to worsen since 2011 -2013. For, the Near East and North Africa, 11% of the region's population – 50.2 million people – are undernourished. The findings of the report showed that the failure to reduce hunger in the area is closely associated with the increase in conflict and violence in several parts of the region, as also highlighted in last year's edition. While the prevalence of undernourishment has risen from 23 to 26 percent in conflict countries since 2011-13, it has remained stable at about 5 percent in non-conflict countries. This year's report goes further to explore the relationship between food insecurity, economic growth and rural transformation. It demonstrates that economic growth in the Near East and North Africa region has been slow compared to other regions, and suggests that rural transformation can improve growth rates and generate decent employment through strengthening rural-urban linkages, improving agricultural productivity, and expanding the rural non-farm economy.

This title is endorsed by Cambridge Assessment International Education to support the full syllabus for examination from 2022. Confidently navigate the updated Cambridge International AS & A Level Chemistry (9701) syllabus with a structured approach ensuring that the link between theory and practice is consolidated, scientific skills are applied, and analytical skills developed. - Enable students to monitor and build progress with short 'self-assessment' questions throughout the student text, with answers at the back of the book, so students can check their understanding as they work their way through the chapters. - Build scientific communication skills and vocabulary in written responses with a variety of exam-style questions. - Encourage understanding of historical context and scientific applications with extension boxes in the student text. - Have confidence that lessons cover the syllabus completely with a free Scheme of Work available online. - Provide additional practice with the accompanying write-in Practical Skills Workbooks, which once completed, can also be used to recap learning for revision.
