Earth science is one of the major fields of science. It is the study of the earth and its history. Earth science is also the study of changes on the earth and the earth's place in space. Earth science is like a jigsaw puzzle made up of four pieces. Each piece is a main branch of earth science. The four main branches are geology, oceanography, meteorology, and space science. - p. 2.

Edited by two experts in the area, *Geoethics: Ethical Challenges and Case Studies in Earth Sciences* addresses a range of topics surrounding the concept of ethics in geoscience, making it an important reference for any Earth scientist with a growing concern for sustainable development and social responsibility. This book will provide the reader with some obvious and some hidden information you need for understanding where experts have not served the public, what more could have been done to reach and serve the public and the ethical issues surrounding the Earth Sciences, from a global perspective. Written by a global group of contributors with backgrounds ranging from philosopher to geo-practitioner, providing a balance of voices Includes case studies, showing where experts have gone wrong and where key organizations have ignored facts, wanting assessments favorable to their agendas Provides a much needed basis for discussion to guide scientists to consider their responsibilities and to improve communication with the public
