This leader's guide introduces the Alert Program (AP) to occupational therapists, parents, teachers, and other professionals. AP promotes awareness of how we regulate our arousal states and encourages the use of sensorimotor strategies to manage our levels of alertness. Knowledge of self-regulation and a repertoire of strategies enhance our abilities to learn, interact with others, and work or play within our environment in addition to building self-esteem, self-confidence, and self-monitoring skills. It presents a strong awareness of sensory integration.

Suspension is probably the most misunderstood aspect of motorcycle performance. This book, by America's premier suspension specialist, makes the art and science of suspension tuning accessible to professional and backyard motorcycle mechanics alike. Based on Paul Thede's wildly popular Race Tech Suspension Seminars, this step-by-step guide shows anyone how to make their bike, or their kid's, handle like a pro's. Thede gives a clear account of the three forces of suspension that you must understand to make accurate assessments of your suspension's condition. He outlines testing procedures that will help you gauge how well you're improving your suspension, along with your riding. And, if you're inclined to perfect your bike's handling, he even explains the black art of chassis geometry. Finally, step-by-step photos of suspension disassembly and assembly help you rebuild your forks and shocks for optimum performance. The book even provides detailed troubleshooting guides for dirt, street, and supermoto--promising a solution to virtually any handling problem.

Environmental Economics, has established itself as one of its field's most authoritative texts, as well as one of the more challenging. It distinguishes itself from other books by presupposing that readers already have an understanding of intermediate microeconomics. Thus, this book concentrates only on environmental economics - problems of pollution of earth, air, and water - with an emphasis on regulation and private-sector anti-pollution incentives, and coverage of international examples.

XL500S (1979-1981), XL500R (1982), XR500 (1979-1980), XR500R (1981-1984), XL600R (1983-1987), XR600R (1985-1990)

This supplement, prepared by Mary Kay Orgill of the University of Nevada, Las Vegas, contains detailed solutions and explanations for all problems in the main text that have colored numbers.
