Modern seismology has faced new challenges in the study of earthquakes and their physical characteristics. This volume is dedicated to the use of new approaches and presents a state-of-the-art in historical seismology. Selected historical and recent earthquakes are chosen to document and constrain related seismic parameters using updated methodologies in the macroseismic analysis, field observations of damage distribution and tectonic effects, and modelling of seismic waveforms.

This story's success can be explained by considering it a myth and analysing how this myth engages with contemporary discourses, such as the definition of the ideal wife, the querelle des femmes, the socio-political consequences of social exogamy, and tyranny.

This book is the first complete study of the translations of Machiavelli's Prince made in Europe and the Mediterranean countries during the period from the sixteenth to the first half of the nineteenth century: the first, unpublished French translation by Jacques de Vintimille (1546), the first Latin translation by Silvestro Tegli (1560), as well as the first translations in Dutch (1615), German (1692), Swedish (1757) and Arabic (1824). The first translation produced in Spain - dated somewhere between the end of the sixteenth and the early seventeenth century - remained in manuscript form, while there was a second vernacular Spanish version around 1680. The situation in Great Britain was different from the rest
