DESCARTES' DREAM: from Descartes' Dream, by Phillip J. Davis and Reuben Hirsh. THE MODERN WORLD, our world of triumphant rationality, began on November 10, 1619, with a revelation and a nightmare. On that day, in a room in the small Bavarian village of Ulm, René Descartes, a Frenchman, twenty-three years old, crawled into a wall stove and, when he was well warmed, had a vision.

DESCARTES' DREAM

René Descartes, one of the greatest philosophers of all time, said information we receive through our senses does not necessarily have to be accurate. According to Descartes' dream argument, there are no definite signs to distinguish dream experience from waking experience. Born in Touraine, France, René Descartes (1596-1650) was a highly influential philosopher, mathematician, and scientist.

René Descartes' Dream Argument - How Do We Know We Are Not ...

In Descartes dream argument, he states there are no reliable signs distinguishing sleeping from waking. In his dream argument, he is not saying we are merely dreaming all of what we experience, nor, is he saying we can distinguish dreaming from being awake. I think his point is we cannot be for sure what we experience as being real in this world is actually real.

In the Sixth Meditation, Descartes finally tried to eliminate the dream problem by proving that there is a material world and that bodies do really exist. His argument derives from the supposition that divinely-bestowed human faculties of cognition must always be regarded as adequately designed for some specific purpose.

Descartes: Human Nature

The dream argument came to feature prominently in Mahayana and Tibetan Buddhist philosophy. Some schools of thought (e.g., Dzogchen) consider perceived reality to be literally unreal. As Chögyal Namkhai Norbu puts it: "In a real sense, all the visions that we see in our lifetime are like a big dream"

Dream argument - Wikipedia

The World, also called Treatise on the Light, is a book by René Descartes. Written between 1629 and 1633, it contains a nearly complete version of his philosophy, from method, to metaphysics, to physics and biology. Descartes espoused mechanical philosophy, a form of natural philosophy popular in the 17th century. He thought everything physical in the universe to be made of tiny "corpuscles" of matter. Corpuscularianism is closely related to atomism. The main difference was that Descartes ...

Descartes' Methodic Doubt. René Descartes (1596-1650) is an example of a rationalist. According to Descartes, before we can describe the nature of reality (as is done in metaphysics) or say what it means for something to be or exist (which is the focus of ontology), we must first consider what we mean when we say we know what reality, being, or existence is.
