Updating recommendations last made by the National Research Council in the mid-1980s, this report provides nutrient recommendations based on physical activity and stage in life, major factors that influence nutrient needs. It looks at how nutrients are metabolized in the bodies of dogs and cats, indications of nutrient deficiency, and diseases related to poor nutrition. The report provides a valuable resource for industry professionals formulating diets, scientists setting research agendas, government officials developing regulations for pet food labeling, and as a university textbook for dog and cat nutrition. It can also guide pet owners feeding decisions for their pets with information on specific nutrient needs, characteristics of different types of pet foods, and factors to consider when feeding cats and dogs.

This comprehensive guide provides diet and feeding recommendations for both healthy and sick animals. Recommendations are based on a physical and nutritional assessment of the patient, and the wishes and abilities of clients. Suggested dietary interventions are assessed based on indications, possible adverse reactions, contradictions, and ongoing evaluation.

Ancestors and canine cousins of our dogs didn't eat "krunchy kibble" or "meat 'n gravy in a can." They ate what they found or

caught... and it wasn't cooked or "enriched" either! It was high in protein, with balanced fats, and usually included a few fruits, vegetables and grasses. Steve Brown, an expert on canine nutrition, shows how you can bring the benefits of the canine ancestral diet to your dog by feeding him differently as little as just one day a week. And no, you won't need to lead a pack of dogs on a hunting expedition! Just follow Steve's well-researched and easy to follow ABCs to make improvements to whatever your dog currently eats. **BONUS!** Raw food or home prepared feeders will learn how to balance nutrients more precisely, especially fats, for optimum health. A dog diet to get wild about!

- Learn about the latest research on the importance of protein and healthy fats in your dog's diet.
- Find out why commercial foods can't include these fragile-but-crucial nutrients, and how you can make sure your dog gets them.
- Just one day a week, or more frequently if you choose, follow the simple recipes that balance the nutrition in the commercial food you are feeding—wet or dry!

Through surprising facts, moving stories and tested solutions, the veterinary expert from Good Morning America and The Dr. Oz Show will give every dog owner the secrets to raising a healthy, well-behaved dog. For anyone who owns a dog or is thinking about getting one, Dr. Marty Becker's manual is a must-have guide to anything and everything canine. In *Your Dog: The Owner's Manual*, the "best-loved family doctor for pets" shares insider secrets on how to keep puppy problems from becoming doggy disasters and how to best bond with your dog through helpful, easily accessible tips and tricks on how to:

- Find the right dog for your family's lifestyle
- Solve the most annoying behavioral problems
- Make sure your dog gets the exercise he needs
- Use food puzzles to prevent weight gain
- Prevent dog health problems
- Save money on medication, both traditional and alternative

For seasoned dog

owners as well as those looking to adopt a new friend, Dr. Becker provides all the insight that makes for both happy owners and happy dogs.

This BSAVA Manual is a handbook for veterinary practitioners and students, biological scientists and nutritionists, with an interest in nutrition and feeding of companion animals. It addresses the ever increasing dimension of dietary management, in both health and disease, in the daily conduct of companion animal practice. The book aims to bridge the knowledge gap between theoretical nutrition and the practical feeding of healthy or sick animals. It systematically covers food types, dietary needs and appropriate feeding of dogs, cats, other small mammals, reptiles, birds and fish in health and sickness. BSAVA, BVNA and FECAVA members can claim their member discount by ordering direct from: British Small Animal Veterinary Association Woodrow House, 1 Telford Way, Waterwells Business Park, Quedgeley, Gloucester, GL2 4AB, Tel: 01452 726709, Fax: 01452 726701, E-mail: [publications@bsava.com](mailto:publications@bsava.com)

Discusses canine care, containing sections on nutrition, health, feeding, grooming, first aid, caring for older dogs, and obedience training.

For more than forty years, animal health professionals have turned to the Merck Veterinary Manual for integrated, concise and reliable veterinary information. Now this manual covering the diagnosis, treatment, and prevention of diseases of companion, food and zoo animals is available on an easy-to-use, fully searchable CD-ROM. The CD includes the full text of The Merck Veterinary Manual 8/e and has been enhanced with picture links featuring original anatomical artwork and numerous clinical and diagnostic illustrations, table links and quick search links that provide quick access to cross referenced text.

If cats and dogs could write an instruction manual for their humans, Health and Nutrition for Dogs and Cats would be the result. This book sets out guidelines for feeding your pet, helps explain factors that contribute to a good (or bad) diet, and the ways in which people can help their dogs or cats maintain good overall health.

Filled with 80 pages of color photos, this volume offers facts and advice on canine diet, nutrition, training, exercise, grooming, and health care.
