This book offers an introductory Earth Science course stripped of unnec-essary details that lead to confusion. It covers the New York State Core Curriculum for the Physical Setting—Earth Science. 2. Clear understandable presentation. Although you will meet many new scientific terms in this book, you will find

EARTH SCIENCE

Minerals, Rocks, and Soil. Earth is made up various living and nonliving materials. Elements form minerals, and minerals form rocks. Different rock types - igneous, sedimentary, and metamorphic - transform at various points in the rock cycle. Through the processes of weathering and erosion, rocks change, break, and move.
