In this book fisheries biologists,
ecologists, limnologists, oceanographers,
aquatic resource managers and planners,

commercial fisherman and environmental scientists are offered information on the latest artificial fishing reef designs, siting and placement methods, and ecological research as well as an overview of current united states legislation and regulations.

Beneath the coastal waters of the world lie thousands of artificial reefs. Some are old and retired freighters and ships that once plied the oceans of the world but now serve as habitats for marine life. Others are newer reefs that have been designed and built for specific applications. With the field of aquatic habitat technology continually growing, this book responds to the global need for a compendium of consistent and reliable practices with which to evaluate how well artificial reefs meet their objectives. *Artificial Reef Evaluation With Application to Natural Marine Habitats* is a comprehensive guide to the methods used to document the performance of artificial reefs in coastal and oceanic waters. It is the first volume to combine the essential disciplines required for proper evaluation, including engineering, economics, biology, and statistics. This work covers the design of reef studies, multi-disciplinary methods of investigation, data analysis, and examples of applying the methods to reefs built for different purposes. Further, the methods examined in this book apply to other benthic marine habitats, such as coral reefs or "live

bottoms", thus expanding the book's relevance to a wider audience and enhancing research efforts in the field of artificial habitat technology.

Written by a practicing business attorney with startup experience in the environmental and technology sectors, this comprehensive handbook assists entrepreneurs in tackling the wide variety of opportunities to go green. A one-stop resource for entrepreneurs, it helps readers incorporate clean technology, environmental practices, and green business approaches into the work environment. The book discusses how to sell to utilities, explores fundraising outlets for green businesses, covers government incentives, presents key startup tools aimed at green businesses, and addresses challenges of many new businesses, such as raising money and making sales. Additional resources are available on the book's website.

The precise shape of a protein is a crucial factor in its function. How do proteins become folded into the right conformation? Molecular chaperones and protein folding catalysts bind to developing polypeptides in the cytoplasm and ensure correct folding and transport. This Guidebook catalogues the latest information on nearly 200 of these molecules, including the important class of heat shock proteins; each entry is written by leading researchers in the field.

When it comes to knitting, who knows better than our nan? If you get tangled in a ball of wool, she's always the first person you call to help you sort your cross stitch from your cable. While recruiting for her fledgling online knitwear company, Katie Mowat swiftly realised that it was mainly older women, namely grannies, who were volunteering their services, and so Grannies Inc. was born. Since 2009 they have gone from strength to strength, and from one product (beanies), they now design and produce a whole range of knitwear. Her crack squad of 15 grannies will be contributing their 'purls' of wisdom and patterns to help the new knitting generation in this attractive book. With knitting patterns for snoods, legwarmers, slouch socks, laptop cases and beanies, you'll be cool and cosy in no time. As the grannies say, 'May your bobbin always be full.'
