~~Elements of Computer Network — GeeksforGeeks~~

Basic elements of a computer network include hardware, software, and protocols. The interrelationship of these basic elements constitutes the infrastructure of the network. A network infrastructure is the topology in which the nodes of a local area network (LAN) or a wide area network (WAN) are connected to each other.

Internet Protocols The Internet Protocol (IP) family contains a set of related and widely used network protocols. Besides the Internet Protocol itself, higher-level protocols such as TCP, UDP, HTTP, and FTP all integrate with IP to provide additional capabilities. Similarly, lower-level Internet Protocols such as ARP and ICMP also coexist with IP.
