“Blood-boiling...with quippy analysis...Taub proposes straightforward fixes and ways everyday people can get involved in taking white-collar criminals to task.”--San Francisco Chronicle How ordinary Americans suffer when the rich and powerful use tax dodges or break the law to get richer and more powerful--and how we can stop it. There is an elite crime spree happening in America, and the privileged perps are getting away with it. Selling loose cigarettes on a city sidewalk can lead to a choke-hold arrest, and death, if you are not among the top 1%. But if you're rich and commit mail, wire, or bank fraud, embezzle pension funds, lie in court, obstruct justice, bribe a public official, launder money, or cheat on your taxes, you're likely to get off scot-free (or even win an election). When caught and convicted, such as for bribing their kids' way into college, high-class criminals make brief stops in minimum security "Club Fed" camps. Operate the

scam from the executive suite of a giant corporation, and you can prosper with impunity. Consider Wells Fargo & Co. Pressured by management, employees at the bank opened more than three million bank and credit card accounts without customer consent, and charged late fees and penalties to account holders. When CEO John Stumpf resigned in "shame," the board of directors granted him a \$134 million golden parachute. This is not victimless crime. Big Dirty Money details the scandalously common and concrete ways that ordinary Americans suffer when the well-heeled use white collar crime to gain and sustain wealth, social status, and political influence. Profiteers caused the mortgage meltdown and the prescription opioid crisis, they've evaded taxes and deprived communities of public funds for education, public health, and infrastructure. Taub goes beyond the headlines (of which there is no shortage) to track how we got here (essentially a post-Enron failure of prosecutorial muscle, the growth of "too big to jail" syndrome, and a developing implicit immunity of the upper class) and pose solutions that can help catch and convict offenders.

Bringing Up Bébé meets Last Child in the Woods in this “fascinating exploration of the importance of the outdoors to childhood development” (Kirkus Reviews) from a Swedish-American mother who sets out to discover if the nature-centric parenting philosophy of her native Scandinavia holds the key to healthier, happier lives for her American children. Could the Scandinavian philosophy of “There’s no such thing as bad weather, only bad clothes” hold the key to happier, healthier lives for American children? When Swedish-born Linda Åkeson McGurk moved to Indiana, she quickly learned that the nature-centric parenting philosophies of her native Scandinavia were not the norm. In Sweden, children play outdoors year-round, regardless of the weather, and letting babies nap outside in freezing temperatures is common and recommended by physicians. Preschoolers spend their days climbing trees, catching frogs, and learning to compost, and environmental education is a key part of the public-school curriculum. In the US, McGurk found the playgrounds deserted, and preschoolers were getting drilled on academics with little time for free play in nature. And when a swimming outing at a nearby creek ended with a fine from a park officer, McGurk realized that the parenting philosophies of her native country and her adopted homeland were worlds apart. Struggling to decide what was best for her family, McGurk embarked on a six-month journey to Sweden with her two daughters to see how their lives would change in a place where spending time in nature is considered essential to a good childhood. Insightful and lively, There’s No Such Thing as Bad Weather is a fascinating personal narrative that illustrates how Scandinavian culture could hold the key to raising healthy, resilient, and confident children in America.
