Charles Darwin Webquest

On this WebQuest adventure we will be expanding our knowledge and diving into natural selection and evolution. The purpose of this WebQuest is to learn more about natural selection. Our focus question is "What big factors have caused the evolution and diversity of organisms?" Objectives: 1. Describe the important observations that Darwin made on his voyage and what struck him about his observations. 2. Explain how natural selection leads to evolution. 3.

Natural Selection 1.1 | Create WebQuest

Living things have slowly evolved and adapted to changes in the natural world. Evolution is the process through which species change over time. The basis for the theory of evolution came from observation by Charles Darwin. Darwin proposed that evolution could be explained through a process he called natural selection.

Natural Selection | Create WebQuest

Learning about the life and work of scientist Charles Darwin can be more engaging with a lesson plan incorporating a WebQuest. Students can do their own research to learn more about the "Father of Evolution" by using these questions with the links provided.
