their choice. Students often struggle through the scholarly writing process, from finding a topic to polishing a final paper, and many never fully develop and defend a thesis. *Scholarly Writing: Ideas, Examples, and Execution* offers a lifeline to students, guiding them through the process of constructing their legal research papers from start to finish. With over 10 years combined experience teaching scholarly writing to J.D. and LL.M. students, the authors identify common roadblocks for student writers, and offer advice and techniques for how to successfully overcome these roadblocks. The book walks students through a five-step process for researching and writing scholarly papers and

This example-based approach sets this book apart from others; the authors not only tell students how to approach their papers, but through annotated excerpts of example papers, they show students how to approach their papers. The book includes up-to-date information about legal research and organizational tools. It also includes “bright ideas” that supplement the text with ideas and examples for student writers. The text may be used as either a required text for a course in Scholarly Legal Writing or a companion guide for students working on scholarly legal writing

Many scientists and engineers consider themselves poor writers or find the writing process difficult. The good news is that you do not have to be a talented writer to produce a good scientific paper, but you do have to be a careful writer. In particular, writing for a peer-reviewed scientific or engineering journal requires learning and executing a specific formula for presenting scientific work. This book is all about teaching the style and conventions of writing for a peer-reviewed scientific journal. From structure to style, titles to tables, abstracts to author lists, this book

knowledge of the state of the field and disseminating their research through publishing. To accomplish this, the book is split into four sections: Empirical Methods, Important Mathematics Education Themes, Academic Writing and Academic Publishing, and a section Looking Ahead. The chapters are based on workshops that were presented in the Early Career Researcher Day at the 13th International Congress on Mathematical Education (ICME-13). The combination of presentations on methodological approaches and theoretical perspectives shaping the field in mathematics education research, as well as the strong emphasis on academic writing and publishing, offered strong insight into the
