The Bohensky Dissection Series has been used successfully by more than 300,000 biology students nationwide. Each book in the series is designed to guide the student through the

study of anatomical structures. The books do this through the use of clearly marked photographs and illustrations.

Accompanying text offers the student both easy-to-follow dissection instructions and

factual information about the section under observation. At the end of each chapter there are tests which can be used for self-study or for grade course evaluation. Within the traditional dissection
