By combining algebraic and graphical approaches with practical business and personal finance applications, Financial Algebra offers an applications based learning approach incorporating Algebra I, Algebra II, and Geometry topics. Explanations and exercises encourage students to be actively involved in applying mathematical ideas to their everyday lives -- credit, banking insurance, the stock market, independent living and more.

By combining algebraic and graphical approaches with practical business and personal finance applications, FINANCIAL ALGEBRA, Second Edition, motivates high school students to explore algebraic thinking patterns and functions in a financial context. FINANCIAL ALGEBRA, Second Edition will help your students achieve success by offering an applications based learning approach incorporating Algebra I, Algebra II, and Geometry topics. Authors Gerver and Sgroi have spent more than 25 years working with students of all ability levels and they have found the most success when connecting math to the real world. With new features, such as What's the Problem?, FINANCIAL ALGEBRA, Second Edition encourages students to be actively involved in applying mathematical ideas to their everyday lives. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Learn the math skills you need to process information, analyze data, and more with FINANCIAL MATH REVIEW, a 30-hour text-workbook. Through easy-to-understand directions and common vocabulary terms, you'll get the best instruction available on whole numbers, fractions, decimals, equations, percentages, and measurement. FINANCIAL MATH REVIEW also helps you get the most out of your calculator by giving you the quick tips you need. Plus, you'll learn how to use math to simplify your life and make better decisions.

Never HIGHLIGHT a Book Again! Virtually all of the testable terms, concepts, persons, places, and events from the textbook are included. Cram101 Just the FACTS101 studyguides give all of the outlines, highlights, notes, and quizzes for your textbook with optional online comprehensive practice tests. Only Cram101 is Textbook Specific. Accompanys: 9780538449670 9781111782603 .

Longlisted for the National Book Award New York Times Bestseller A former Wall Street quant sounds an alarm on the mathematical models that pervade modern life -- and threaten to rip apart our social fabric We live in the age of the algorithm. Increasingly, the decisions that affect our lives--where we go to school, whether we get a car loan, how much we pay for health insurance--are being made not by humans, but by mathematical models. In theory, this should lead to greater fairness: Everyone is judged according to the same rules, and bias is eliminated. But as Cathy O'Neil reveals in this urgent and necessary book, the opposite is true. The models being used today are opaque, unregulated, and uncontestable, even when they're wrong. Most troubling, they reinforce discrimination: If a poor student can't get a loan because a lending model deems him too risky (by virtue of his zip code), he's then cut off from the kind of education that could pull him out of poverty, and a vicious spiral ensues. Models are propping up the lucky and punishing the downtrodden, creating a "toxic cocktail for democracy." Welcome to the dark side of Big Data. Tracing the arc of a person's life, O'Neil exposes the black box models that shape our future, both as individuals and as a society. These "weapons of math destruction" score teachers and students, sort resumes, grant (or deny) loans, evaluate workers, target voters, set parole, and monitor our health. O'Neil calls on modelers to take more responsibility for their algorithms and on policy makers to regulate their use. But in the end, it's up to us to become more savvy about the models that govern our lives. This important book empowers us to ask the tough questions, uncover the truth, and demand change. -- Longlist for National Book Award (Non-Fiction) -- Goodreads, semi-finalist for the 2016 Goodreads Choice Awards (Science and Technology) -- Kirkus, Best Books of 2016 -- New York Times, 100 Notable Books of 2016 (Non-Fiction) -- The Guardian, Best Books of 2016 -- WBUR's "On Point," Best Books of 2016: Staff Picks -- Boston Globe, Best Books of 2016, Non-Fiction

This book teaches multiple regression and time series and how to use these to analyze real data in risk management and

A fresh perspective on what it takes to run a moneymaking small business If you're a small business owner, you probably started out with a great idea, an entrepreneurial dream, and the willingness to work as hard as you have to. You're up-and-running, your products and services are selling, and you are working as hard as you can. But where do you go from here? How do you get there? And how can you be sure your business will make you money now and for the long term? Found Money presents a new and powerful approach to small-business success. It helps you figure out, instantly, whether your business is on-track or flying off the rails (and how to correct it if it is flying off the rails). Not only does it help you understand how your business makes you money, but how to control that process as well. It offers accessible, easy-to-use tools and tactics to help you understand the links between what happens in your small business and the financial results you achieve so you can proactively create the financial results you want. Helps you maximize the money your small business makes by showing you where additional profit and cash flow is hiding right now in your business Steve Wilkinghoff is an accountant and consultant who helps businesses reach their full, money-making potential Foreword by Michael Gerber, preeminent small business guru If you own your own small business but don't know how to take control of the financial results it gives you, Found Money hands you the strategies, tactics and tools you need to take control, and direct and maximize the money-making process.
