Fueled by Artificial Intelligence (AI) and the Cloud, this shift is already transforming the way health and medical services are provided. if you become that supplier it can transform a company. There are many outstanding examples: Magna International grew in several stages from a supplier of basic individual auto parts to a company manufacturing a product/service 'super-bundle'; ultimately sourcing and assembling the entire car itself. GE developed their business involving the supply of medical imaging machines to hospitals to become a 'super-bundler' of complete hospital radiological floor imaging operations planning, installation, and integration. IBM transformed their position as a supplier of individual hardware, software, and peripherals to companies into a product/service solution 'bundler' of increasing complexity, and finally into the 'super-bundle' of BPO
