Geomorphology And

Glacial History Of The

Glacier morphology, or the form a glacier takes, is

influenced by temperature,

precipitation, topography,

and other factors. The goal

of glacial morphology is to

gain a better understanding

Page 19/56

Access Free

Geomorphology And

of glaciated landscapes, and the way they are shaped.

Types of glaciers can range from massive ice sheets,

such as the Greenland ice sheet, to small cirque

glaciers found perched on mountain tops. Glaciers can

Page 20/56

Access Free

Geomorphology And

be grouped into two main categories: Ice flow is constrained by the underlying bedrock

topography
