Mit etwa 11.000 Einträgen in der deutschen und ca. 17.000 Einträgen in der englischen Spalte umfasst dieses Taschenwörterbuch folgende Bereiche: - Grundlegender technischer Wortschatz - Maschinenbau - Handwerkzeuge - Werkzeugmaschinen - Anlagenbau - Fördertechnik, insbesondere Aufzugstechnik als Anwendungsgebiet - Werkstofftechnik mit Werkstoffprüfung - Elektrotechnik - Elektronik - Steuerungs- und Regelungstechnik - Fachsprachliche Redewendungen - Fachgebietsübergreifende Begriffe

Corporate Social Responsibility Failures in the Oil Industry directly challenges the oil industry's claims of corporate good citizenship, now widely advanced as part of a global public relations initiative. The volume spans the industry's reach, from the troubled waters of the UK offshore Continental Shelf, with its horrendous legacy of the Piper Alpha oil rig disaster, to the inhospitable shores of Newfoundland with its own tragic legacy of lost lives; to the new frontier of oil corporate colonialism in the former Soviet Union and the icy plains of Alaska. The central theme of violations of basic labour rights and of health and environmental protection standards will make uncomfortable reading in the boardroom. It is equally essential reading for those who seek to improve the position of workers and industries within the oil industry's global reach.

The thesis describes the design and fabrication of a control console for the Minuteman 1 D17B computer. The console was built so that the D17B could be used in a laboratory for reutilization study and digital experimentation. Circuit design procedures, theory of operation, and detailed schematic diagrams are provided. Also, operating instructions, maintenance check-out procedures, wire lists, signal specifications, and a parts list are included. The information necessary to operate and maintain the D17B Computer Conrol Console is provided in this thesis. It can also serve as engineering data documentation to others interested in a similar project. (Author).

This manual contains a description, installation, troubleshooting, maintenance and repair, and parts list information for the operators Control Console used with the DOHN Tensioner System. The Control Console houses the electrical and pneumatic devices used for controlling and monitoring the functions of the Draw Off-Holdback (DOHB) Tension Machine and its electrohydraulic power unit. It also houses the hydraulic pressure gages for monitoring the DOHB hydraulic system. The DOHB tension machine is a hydraulically powered, pneumatically operated machine capable of applying 2,250 pounds of tension at a cable speed of 304 fpm. Power to drive the machine is provided by an individual electrohydraulic power unit. Air for operation of the pneumatic controls is supplied through the control console from ship's air supply. For high speed operation (600 fpm), tension is reduced to 1,125 pounds.
