Nothing frightens a parent more than feeling totally helpless when their child reports, "I'm scared. There's a ghost in my room. I won't sleep there." Onerous questions come to mind, "Is my kid nuts? Am I nuts for believing them? How can I help with something invisible? How am I supposed to fight a phantom?" For the first time, Kids Who See Ghosts provides the answers to these questions, and offers adults guidance in tackling the subject with children. The highly intuitive child is empathic, psychic, or sensitive and can see ghosts. Parental responses to such events range from abject fear, to supporting their child, being unable to act, to visiting doctors and therapists. This guide bridges the gap from mainstream to the metaphysical, providing answers and guidance. It doesn't matter whether parents believe in ghosts to know how to help children through frightening experiences. Goode challenges readers to open their minds for the journey through ghost tales and to learn empowerment strategies for their kids. Kids Who See Ghosts includes interviews with experts from diverse backgrounds, from Dr. Bruce Lipton to Lynn Andrews, from science to shamanism, to give a well rounded perspective on our perception of the afterlife, intuition, psychic abilities, and belief.

To be illustrated with stills and posters from each movie and (hopefully) portraits of directors, writers and creative team.

The achievement of students of color continues to be disproportionately low at all levels of education. More than ever, Geneva Gay's foundational book on culturally responsive teaching is essential reading in addressing the needs of today's diverse student population. Combining insights from multicultural education theory and research with real-life classroom stories, Gay demonstrates that all students will perform better on multiple measures of achievement when teaching is filtered through their own cultural experiences. This bestselling text has been extensively revised to include expanded coverage of student ethnic groups: African and Latino Americans as well as Asian and Native Americans as well as new material on culturally diverse communication, addressing common myths about language diversity and the effects of "English Plus" instruction.

All children are born with emotional talent. But if left untended, those talents can wane during the first five years of life. Children are sensitive and social beings from birth, exhibiting an innate enthusiasm for communication that must be satisfied for healthy development. If their feelings, agency, and motivations are met with affection, if they are respected and nurtured, then children will respond creatively and that inherent desire for companionship will flourish. However, with the recent changes in political and educational systems, early years education has seen a decline in focus on the emotional wellbeing of children and the development of their creativity. Those systems need to adapt if educators are to bring out the best in our future generations. By nurturing creativity and emotional wellbeing in the first five years of life, long term social benefits can be wrought. The book focusses on children's readiness for learning. It addresses the natural joy explicit in children's early conversations and engagement with music and their development through play with both adults and other children. This kind of education allows children to develop their bodies and skills, accept and understand their feelings, build relationships, and progress both their imagination and their problem solving skills. In this way, play with others drives development. With contributors from the fields of psychological, educational, and political spheres, this book will be of interest to anyone concerned for the future of our children.
