This book looks at how Islamic law was practiced in Russia from the conquest of the empire's first Muslim territories in the mid-1500s to the Russian Revolution of 1917, when the empire's Muslim population had exceeded 20 million. It focuses on the training of Russian Muslim jurists, the debates over legal authority within Muslim communities and the relationship between Islamic law and 'customary' law. Based upon difficult to access sources written in a variety of languages (Arabic, Chaghatay, Kazakh, Persian, Tatar), it offers scholars of Russian history, Islamic history and colonial history an account of Islamic law in Russia of the same quality and detail as the scholarship currently available on Islam in the British and French colonial empires.

The war in Georgia. Tensions with Ukraine and other nearby countries. Moscow's bid to consolidate its "zone of privileged interests" among the Commonwealth of Independent States. These volatile situations all raise questions about the nature of and prospects for Russia's relations with its neighbors. In this book, Carnegie scholar Dmitri Trenin argues that Moscow needs to drop the notion of creating an exclusive power center out of the post-Soviet space. Like other former European empires, Russia will need to reinvent itself as a global player and as part of a wider community. Trenin's vision of Russia is an open Euro-Pacific country that is savvy in its use of soft power and fully reconciled with its former borderlands and dependents. He acknowledges that this scenario may sound too optimistic but warns that the alternative is not a new version of the historic empire but instead is the ultimate marginalization of Russia.

The central argument of this book is that the half-century of Russian rule in Central Asia was shaped by traditions of authoritarian rule, by Russian national interests, and by a civic reform agenda that brought to Turkestan the principles that informed Alexander II's reform policies. This civilizing mission sought to lay the foundations for a rejuvenated, 'modern' empire, unified by imperial citizenship, patriotism, and a shared secular culture. Evidence for Brower's thesis is drawn from major archives in Uzbekistan and Russia. Use of these records permitted him to develop the first interpretation, either in Russian or Western literature, of Russian colonialism in Turkestan that draws on the extensive archival evidence of policy-making, imperial objectives, and relations with subject peoples.

The most powerful force in the world economy today is the redefinition of the relationship between state and marketplace - a process that goes by the name of privatization though this term is inadequate to express its far-reaching changes. We are moving from an era in which governments sought to seize and control the 'commanding heights' of the economy to an era in which the idea of free markets is capturing the commanding heights of world economic thinking. Basic views of how society ought to be organized are undergoing rapid change, trillions of dollars are changing hands and so is fundamental political power. Great new wealth is being created - as are huge opportunities and huge risks. Taking a worldwide perspective, including Britain, where the process began with Mrs Thatcher, Europe and the former USSR, China, Latin America and the US, THE COMMANDING HEIGHTS shows how a revolution in ideas is transforming the world economy - why it is happening, how it can go wrong and what it will mean for the global economy going into the twenty-first century.

This thoughtful book describes the range of nationalist ideas that have taken root in Russia since 1856. Drawing on a wide range of archival documents and unparalleled interview material from the post-Soviet period, Tuminez analyzes two cases_Russian panslavism in 1856-1878 and great power nationalism in 1905-1914_when aggressive nationalist ideas clearly influenced Russian foreign policy and contributed to decisions to go to war. Yet not all forms of nationalism have been malevolent, and the author assesses competing nationalist ideologies in the post-Soviet period to clarify the conditions under which a particularly belligerent nationalism could flourish and influence Russian international behavior.
