Offers a useful reminder of the role of modern science in fundamentally transforming all of our lives. President Barack Obama (on Twitter) An important book. Steven Pinker, The New York Times Book Review Now also a PBS documentary series: the surprising story of how humans gained what amounts to an extra life, from the bestselling author of How We Got to Now and Where Good Ideas Come From As a species we have doubled our life expectancy in just one hundred years. All the advances of modern life—the medical breakthroughs, the public health institutions, the rising standards of living—have given us each about twenty thousand extra days on average. There are few measures of human progress more astonishing than our increased longevity. This book is Steven Johnson's attempt to understand where that progress came from. How many of those extra twenty

# Get Free Haberdashers 11 Past Papers

thousand days came from vaccines, or the decrease in famines, or seatbelts? What are the forces that now keep us alive longer? Behind each breakthrough lies an inspiring story of cooperative innovation, of brilliant thinkers bolstered by strong systems of public support and collaborative networks. But it is not enough simply to remind ourselves that progress is possible. How do we avoid decreases in life expectancy as our public health systems face unprecedented challenges? What current technologies or interventions that could reduce the impact of future crises are we somehow ignoring? A study in how meaningful change happens in society, *Extra Life* is an ode to the enduring power of common goals and public resources. The most fundamental progress we have experienced over the past few centuries has not come from big corporations or start-ups. It has come,

# Get Free Haberdashers 11 Past Papers

instead, from activists struggling for reform; from university-based and publicly funded scientists sharing their findings open-source-style; and from nonprofit agencies spreading new innovations around the world.

This major, revisionist reference work explains for the first time how the Stationers' Company acquired both a charter and a nationwide monopoly of printing. In the most detailed and comprehensive investigation of the London book trade in any period, Peter Blayney systematically documents the story from 1501, when printing first established permanent roots inside the City boundaries, until the Stationers' Company was incorporated by royal charter in 1557. Having exhaustively re-examined original

# Get Free Haberdashers 11 Past Papers

sources and scoured numerous archives unexplored by others in the field, Blayney radically revises accepted beliefs about such matters as the scale of native production versus importation, privileges and patents, and the regulation of printing by the Church, Crown and City. His persistent focus on individuals – most notably the families, rivals and successors of Richard Pynson, John Rastell and Robert Redman – keeps this study firmly grounded in the vivid lives and careers of early Tudor Londoners.
