Hitachi CCI can be configured to use either LAN to get data from the storage or command device (LUN/Volume). Command device is recommended when you have many of storage to monitor (HDS recommends 40+). LAN configuration is described in our standard storage access manual. Document describes installation on Linux RHEL 7.3.

Hitachi Vantara Support helps you to manage support cases, download products and tools, answers your queries with community conversations and provides learning with its training and certifications.

Hitachi Vantara Support

Hitachi HUR storage management uses Command Control Interface (CCI) operations from the AIX® operating system and GDR environment. The KSYS subsystem uses CCI to discover and integrate the Hitachi storage replication into the disaster recovery framework of GDR. This integration manages disaster recovery for applications that use the mirrored storage.
