## Read Online Honda Ct110 Engine Removal

The Honda Trail for 1980 was called the CT110'80. One color was available: Tahitian Red. The "HONDA" decal was red but outlined in white. The decal "TRAIL 110" appeared only on the left side cover. The ignition used points and condenser. The engine was a single cylinder displacing 105cc and used a single overhead cam (OHC).

Honda Powersports - home of motorcycles, ATVs and side by sides built with legendary quality, innovation and performance.

~~Honda Powersports - Motorcycles, ATVs, Scooters, SxS~~

Remove the foot peg bracket and the kick starter pedal from its shaft. If the original right side engine case bolts are present, you will need an impact wrench with a #3 Phillips head and a hammer to remove the bolts. Set the impact wrench to "loosen", turning COUNTER CLOCK WISE (anti-clock wise), when it is struck with the hammer.

Except for the engine change, the 1966 models of CT200 and CT90 were the same—the change in model number reflected a new Honda policy that model numbers would indicate engine-size class. The CT200 and 1966 CT90 had a dual rear sprocket, which created a lower gear range for heavy weight or steep terrain.
