The class YDM-4 is Indian Railways' workhorse diesel locomotive.The first units were imported fully built from the American Locomotive Company (Alco) in 1961. Since 1968, it has been manufactured in India by the Diesel Locomotive Works (DLW), Varanasi. The model name stands for metre gauge (Y), diesel (D), mixed traffic (M) engine. The YDM-4 has been the most successful diesel locomotive in ...

Indian locomotive class YDM-4 - Wikipedia
The WAP-4 is a class of passenger hauling electric locomotive used in Indian Railways. The locomotive was developed after its predecessor, the WAP-1, was found inadequate to haul the longer, heavier express trains that were becoming the mainstay of the Indian Railways network. It was introduced in 1994, with a similar body-shell to the WAP-1 class, but with Hitachi traction motors. The electrical systems are traditional direct-current loco type tap changers, driving six traction motors arranged
