In a small, hidden area of your carpet, gently rub the surface with the dampened cloth. Wait ten minutes and check for colour removal or bleed with white paper towel or cloth. If your carpet has more than one colour, check all colours. • When cleaning an entire room, move furniture out of the area to be cleaned.

The wildly popular YouTube star behind Clean My Space presents the breakthrough solution to cleaning better with less effort Melissa Maker is beloved by fans all over the world for her completely re-engineered approach to cleaning. As the dynamic new authority on home and living, Melissa knows that to invest any of our precious time in cleaning, we need to see big, long-lasting results. So, she developed her method to help us get the most out of our effort and keep our homes fresh and welcoming every day. In her long-awaited debut book, she shares her revolutionary 3-step solution: • Identify the most important areas (MIAs) in your home that need attention • Select the proper products, tools, and techniques (PTT) for the job • Implement these new cleaning routines so that they stick Clean My Space takes the chore out of cleaning with Melissa's incredible tips and cleaning hacks (the power of pretreating!) her lightning fast 5-10 minute "express clean" routines for every room when time is tightest, and her techniques for cleaning even the most daunting places and spaces. And a big bonus: Melissa gives guidance on the best non-toxic, eco-conscious cleaning products and offers natural cleaning solution recipes you can make at home using essential oils to soothe and refresh. With Melissa's simple groundbreaking method you can truly live in a cleaner, more cheerful, and calming home all the time.

Composites is designed to be of value to working engineers. Its orientation is practical rather than theoretical, although researchers and students will also find it to be a substantial source of worthwhile information. The 998 pages in this reference book are packed with real-life, how-to-do-it information aimed at solving problems. There are 13 major sections containing 161 separate articles. The information is clear and concise, yet complete. Ranging across a broad area of useful information about structural composites for engineering applications, Composites covers the subject completely and in depth. First constituent materials - the fibres and matrix materials of which composites are made - are described in detail. The forms in which they are available for use are reviewed in depth. Sections on analysis and design of both the basic composites and structures made from composites provide guidance for design and materials engineers. Articles on manufacturing processes cover them in a practical and helpful way. Whole sections on quality control, testing and failure analysis round out the picture Applications for and experience with composites are reported in a section that ranges across aircraft, automotive, marine, and recreational applications. A final section on materials for special applications describes metal-matrix, ceramic, and carbon-carbon composites.
