International Finance is an established and internationally renowned introduction to the subject for undergraduate and postgraduate students. It draws on recent events to provide comprehensive coverage of traditional theories and new research relating to the balance of payments, exchange rate determination and the international monetary system.

This popular textbook offers a broad and accessible introduction to the building blocks of modern finance: financial markets, institutions and instruments. Focussing on the core elements of the subject, the author blends theory with real-life data, cases and numerical worked examples, linking the material to practice at just the right level of technical complexity. This new edition has updated data and cases throughout, ensuring that it is as up-to-date as possible in this fast-moving area. More assessment and self-test resources have been added to the book to help support students and lecturers. It is ideally suited to students at all levels who take economics, business and finance courses, as well as for those who want to understand the workings of the modern financial world. New to this Edition: - New case studies, including coverage of the Libor and foreign exchange rigging scandals, Bitcoin, the FinTech revolution and issues raised by Brexit - Fully updated data and relevant numerical examples - Coverage of derivatives such as futures, options and swaps - Extensive discussion of regulatory developments since the financial crisis - A companion website featuring teaching resources is available

Pilbeam presents a comprehensive yet relatively non-technical introduction to modern day financial institutions, markets and instruments, covering such topics as the role of financial intermediaries and interest rate determination.

This book is the CORE TEXT for Quantitative Methods for Business Management Course Convenors: Lee Fawcett and Daniel Henderson

Cross-border transactions involve a variety of financial operations, including arbitrage, hedging, speculation, financing and investment. These inter-related operations give rise to foreign exchange exposure and affect the overall financial performance of multinational firms. The book aims to provide an integrated treatment of multinational financial operations, whilst taking into account some real world complexities such as bid/offer spreads, transaction costs, capital rationing, and market imperfections.

This textbook introduces students to the fundamental workings of business and finance in the global economy. It brings clarity and focus to the complexities of the field and demonstrates the key linkages between the foreign exchange markets and world money markets. Core topics examined include: corporate aspects of international finance, with special attention given to contractual and operational hedging techniques the mechanics of the foreign exchange markets the building blocks of international finance the optimal portfolio in an international setting. Michael Connolly also provides up-to-date statistics from across the globe, relevant international case studies, problem sets and solutions and links to an online PowerPoint presentation. International Business Finance is an engaging and stimulating text for students in undergraduate and MBA courses in international finance and a key resource for lecturers.

Examines financial crises of the past and discusses similarities between these events and the current crisis, presenting and comparing historical patterns in bank failures, inflation, debt, currency, housing, employment, and government spending.

Finance and Financial Markets is a best selling comprehensive introduction to the financial markets, institutions and instruments that constitute global finance. Its practical approach makes it readily understandable for students on finance and economics courses and those wanting to understand the workings of the modern financial world. This third edition has been thoroughly updated in the wake of the recent financial crisis, and discusses its implications for the finance industry. Key benefits of the third edition:

- New chapter on the credit crunch covering the causes, events and policy response.
- Coverage of recent financial innovations such as collateralized debt obligations and credit default swaps.
- Completely revised chapter 18 on financial regulation focusing on regulatory issues raised by the crisis.
- An extensive set of case studies emphasising the real world of finance including the collapse of AIG and Lehman brothers, behavioural finance, the carry trade, foreign exchange intervention, the TED spread and the VIX index.
