Kumaun University is a state university headquartered in Nainital, Uttarakhand, India. Kumaun University consists of three campuses at Almora, Nainital and Bhimtal; 35 affiliated government colleges; and an almost equal number of affiliated self-financed private institutions spread across the Kumaun region.

With appendices.

Interest in Financial Services Marketing has grown hugely over the last few decades, particularly since the financial crisis, which scarred the industry and its relationship with customers. It reflects the importance of the financial services industry to the economies of every nation and the realisation that the consumption and marketing of financial services differs from that of tangible goods and indeed many other intangible services. This book is therefore a timely and much needed comprehensive compendium that reflects the development and maturation of the research domain, and pulls together, in a single volume, the current state of thinking and debate. The events associated with the financial crisis have highlighted that there is a need for banks and other financial institutions to understand how to rebuild trust and confidence, improve relationships and derive value from the marketing process. Edited by an international team of experts, this book will provide the latest thinking on how to manage such challenges and will be vital reading for students and lecturers in financial services marketing, policy makers and practitioners.

The Encyclopaedia fills a gap in both the history of science and in cultural studies. Reference works on other cultures tend either to omit science completely or pay little attention to it, and those on the history of science almost always start with the Greeks, with perhaps a mention of the Islamic world as a translator of Greek scientific works. The purpose of the Encyclopaedia is to bring together knowledge of many disparate fields in one place and to legitimize the study of other cultures' science. Our aim is not to claim the superiority of other cultures, but to engage in a mutual exchange of ideas. The Western academic divisions of science, technology, and medicine have been united in the Encyclopaedia because in ancient cultures these disciplines were connected. This work contributes to redressing the balance in the number of reference works devoted to the study of Western science, and encourages awareness of cultural diversity. The Encyclopaedia is the first compilation of this sort, and it is testimony both to the earlier Eurocentric view of academia as well as to the widened vision of today. There is nothing that crosses disciplinary and geographic boundaries, dealing with both scientific and philosophical issues, to the extent that this work does. xi PERSONAL NOTE FROM THE EDITOR Many years ago I taught African history at a secondary school in Central Africa.
