We're like diamonds in the sky
You're a shooting star I see
A vision of ecstasy
When you hold me, I'm alive
We're like diamonds in the sky
At first sight I felt the energy of sun rays
I saw the life inside your eyes
So shine bright tonight, you and I
We're beautiful like diamonds in the sky
Eye to eye, so alive
We're beautiful like diamonds in the sky

Astronomers expect our Sun will become
a white dwarf when it dies 5 billion years
from now. Some two billion years after
that, the Sun's ember core will crystallize
as well, leaving a giant diamond in the
center of the solar system. [http:

The rough diamond is then cut by sawing or cleaving (splitting) along the grain of the stone. The pieces are then mounted in a fast-turning lathe where the gem is shaped roughly by a diamond-tipped tool, followed by the bruiting process, which rounds out the stones. Finally the diamonds are polished, allowing all of their facets to emerge.
