The official FAA guide to maintenance methods, techniques, and practices essential for all pilots and aircraft maintenance...

A vital resource for pilots, instructors, and students, from the most trusted source of aeronautic information.

This book gathers selected papers presented at the 2020 World Conference on Information Systems and Technologies (WorldCIST'20), held in Budva, Montenegro, from April 7 to 10, 2020. WorldCIST provides a global forum for researchers and practitioners to present and discuss recent results and innovations, current trends, professional experiences with and challenges regarding various aspects of modern information systems and technologies. The main topics covered are A) Information and Knowledge Management; B) Organizational Models and Information Systems; C) Software and Systems Modeling; D) Software Systems, Architectures, Applications and Tools; E) Multimedia Systems and Applications; F) Computer Networks, Mobility and Pervasive Systems; G) Intelligent and Decision Support Systems; H) Big Data Analytics and Applications; I) Human-Computer Interaction; J) Ethics,

Computers & Security; K) Health Informatics; L) Information Technologies in Education; M) Information Technologies in Radiocommunications; and N) Technologies for Biomedical Applications.

Designed by the Federal Aviation Administration, this handbook is the ultimate technical manual for anyone who flies or wants to learn to fly a helicopter or gyroplane. If you're preparing for private, commercial, or flight instruction pilot certificates, it's more than essential reading: it's the best possible study guide available, and its information can be life saving. In authoritative and understandable language, here are explanations of general aerodynamics and the aerodynamics of flight, navigation, communication, flight controls, flight maneuvers, emergencies, engines, night operations, and much more. With full-color illustrations detailing every chapter, this is a one-of-a-kind resource for pilots and would-be pilots.
