Understanding fuel injection and engine management systems is the key to extracting higher performance from today's automobiles in a safe, reliable, and driveable fashion. Turbochargers, superchargers, nitrous oxide, high compression ratios, radical camshafts: all are known to make horsepower, but without proper understanding and control of fuel injection and other electronic engine management systems, these popular power-adders will never live up to their

potential and, at worst, can cause expensive engine damage. Drawing on a wealth of knowledge and experience and a background of more than 1,000 magazine articles on the subject, engine-control expert Jeff Hartman explains everything from the basics of fuel injection to the building of complex project cars. Hartman covers the latest developments in fuel-injection and engine management technology applied by both foreign and domestic manufacturers, including popular aftermarket systems. No other book in the market covers the subject of engine management systems from as many angles and as comprehensively as this book. Through his continuous magazine writing, author Jeff Hartman is always up-to-date with the newest fuel-injection and engine management products and systems.

This volume, and its companion, *Industrial Technology Development in Malaysia*, examine and evaluate Malaysian industrialization in terms of its experience of and prospects for industrial technology development. The focus is on role played by state-sponsored innovation in the process economic development and in the context of national development strategies. *Technology, Competitiveness and the State*, provides a valuable analysis of the technological development of a Newly Industrializing Country and reflects on whether existing development strategies can be maintained in the wake of the financial crises sweeping the East Asian economies.

China's engagement in Africa is generally portrayed simply as African countries being exploited for their mineral wealth by a wealthy political and economic superpower. Is this always the case? Certain African countries have been able to use China's involvement in the region to grow their economies and solicit renewed interest from previously disengaged foreign powers by using their relationship with China to bolster their political capital. In this thought provoking and original work Lucy Corkin demonstrates how Angola has been amongst the most successful of African nations in this role. The concept of 'African agency' covers a wide range of different countries with very different capabilities and experiences of engaging with China. In each individual county there are a myriad of actors all with increasingly discernible agencies. *Uncovering African Agency; Angola's Management of China's Credit Lines* casts a fascinating new light on China's involvement with her largest African trading partner and through this shows how different African states and the governmental actors within them are able to exploit the relationship to their best advantage.

(GDI) Gasoline Direct Injection Explained (A Gasoline Direct Injection Technology Series) By Mandy Concepcion This book, "(GDI) Gasoline Direct Injection Explained" covers the major points of this technology. It is a must first book for anyone interested in updating and understanding the finer points of this technology. All the major auto makers are now releasing new models with GDI injection. This technology is easy and faster to manufacture, now that the

engineering has pretty much been polished. Gone are the carbon issues of the past. GDI has matured and is here to stay. This book will cover sensors and feedback programs that only GDI systems employ. There are some, but few similarities between GDI and PFI, which we'll cover here. The main differences are in the high pressures needed and the way injectors are triggered (not with 12 volts). Other issues that may render a GDI inoperative are the NOx systems, which is also covered in this book. We hope this book serves as a launching point for a complete and proper GDI Technology training regime. Enjoy.
