A Dahlander motor rated 2 hp at high speed is rated 1 hp at half speed, that is- same torque, half RPM. A Dahlander motor on high speed fed with a VFD will develop the same torque at half speed set on the

Read Book Manual Motor Dahlander

VFD, the same half hp as you get when you switch the motor run on a normal line.

are a Dahlander 2 speed motor and a vfd compatible? I guess this is a Dahlander motor? This motor flips all the windings to the same polarity, north for example, to create set of south fields in between the the windings. So the rotor sees twice as many fields as there are actual windings and the result is half speed.

The electric motors are devices capable of transforming electrical energy into mechanical energy. The squirrel cage and dahlander motors are very used in industrial installations due to its great robustness, reliability and low cost. The starting current consumed by these motors is very high, being harmful to the machine and the protections.
