This table provides a preferred order to the testing of muscle groups for manual muscle testing. Generally, for bilateral muscle testing, each muscle group is first tested on the right and then the left, prior to proceeding to the next muscle group in the list. Some muscle groups are listed here with anti-gravity testing, but for a weaker patient, these would be tested in a sidelying or supine position, per the table below (Testing Positions); the re-test for a weaker patient is indicated in ...

muscle grading and testing procedures

Manual Muscle Testing Grading System. Grading Scale Range: 0 to 5 : 0 : None : No visible or palpable contraction : 1 : Trace : Visible or palpable contraction with no motion (a 1) 2 : Poor : Full ROM gravity eliminated : 3 : Fair : Full ROM against gravity 4 : Good :
