The witchfinder stood on the edge of the square at some distance from the burning stake, savouring his moment of triumph. He saw those witches fly. Did the crowds notice? No! Elspeth, her beauty melting before their eyes as if she were a fragrant candle, charmed them. But Matthew saw. He knew Elspeth survived. Wherever she is, he will find her. He will hunt her down, and one will die. Their soul cast down. It is his solemn vow. He will not suffer a witch to live. She rose with the hot swirling smoke, and tumbled through the centuries, from the clear cool air. All Hallows' Eve looms. A special day when the veil lifts and Elspeth has organised a party . . . A bewitchingly dark fairy tale set in the seventeenth and twenty-first centuries, Somerset.

cancer survivors and “previvors” tell their powerful, inspiring stories in this collection. Drawing from first-hand interviews of successful, high-profile women from myriad industries and perspectives, award-winning journalist Ali Rogin brings together an all-star support and recovery team to inspire anyone confronting a cancer diagnosis, along with their loved ones. Learn how preeminent actresses, musicians, politicians, journalists, and entrepreneurs faced a formidable disease and put it in its place. In their own words, the women of *Beat Breast Cancer Like a Boss* inform and encourage other women by sharing their experiences and advice. Learn how they told loved ones about their diagnoses, navigated treatment options, and managed the work/life/cancer balance. Rogin, too, faced great uncertainty when she tested positively for the BRCA1 genetic mutation at age twenty. She found answers in the vibrant community of breast cancer survivors and “previvors” who also stared down the odds. With her brave decision to undergo a prophylactic bilateral mastectomy before even graduating college, Rogin joined this diverse sisterhood of women confronting breast cancer in its many forms with dignity, strength, and humor.

Most innovations in the car industry are based on software and electronics, and IT will soon constitute the major production cost factor. It seems almost certain that embedded IT security will be crucial for the next generation of applications. Yet whereas software safety has become a relatively well-established field, the protection of automotive IT systems against manipulation or intrusion has only recently started to emerge. Lemke, Paar, and Wolf collect in this volume a state-of-the-art overview on all aspects relevant for IT security in automotive applications. After an introductory chapter written by the editors themselves, the contributions from experienced experts of different disciplines are

structured into three parts. "Security in the Automotive Domain" describes applications for which IT security is crucial, like immobilizers, tachographs, and software updates. "Embedded Security Technologies" details security technologies relevant for automotive applications, e.g., symmetric and asymmetric cryptography, and wireless security. "Business Aspects of IT Systems in Cars" shows the need for embedded security in novel applications like location-based navigation systems and personalization. The first book in this area of fast-growing economic and scientific importance, it is indispensable for both researchers in software or embedded security and professionals in the automotive industry.

This book presents an emerging new vision of the brain, which is essentially expressed in computational terms, for non-experts. As such, it presents the fundamental concepts of neuroscience in simple language, without overwhelming non-biologists with excessive biological jargon. In addition, the book presents a novel computational perspective on the brain for biologists, without resorting to complex mathematical equations. It addresses a comprehensive range of topics, starting with the history of neuroscience, the function of the individual neuron, the various kinds of neural network models that can explain diverse neural phenomena, sensory-motor function, language, emotions, and concluding with the latest theories on consciousness. The book offers readers a panoramic introduction to the "new brain" and a valuable resource for interdisciplinary researchers looking to gatecrash the world of neuroscience.

In the not-too-distant future, in what was once the old City of New York, megacorporations have taken over everything. Now even the internet is owned, and the only way to transmit sensitive information is by a network of highly skilled couriers called “data runners” who run it over the sneakernet. It is a dangerous gig in a dirty world, but Jack Nill doesn’t have much choice in the matter. A brilliant young math whiz and champion of parkour, Jack must become one of these data runners in order to get his father out of a major gambling debt. When a mysterious stranger loads Jack’s chip with a cryptic cargo that everybody wants, he soon becomes the key figure in a conspiracy that could affect the entire North American Alliance. Now it’s all up to Jack. With the help of his best friend, Dexter, and a girl who runs under the name Red Tail, Jack will have to use all his skills to outrun the retrievers and uncover the truth before they catch him and clip him for good.
