CTE Resource Center - Administrative Planning Guide ...

Manufacturing, any industry that makes products from raw materials by the use of manual labor or machinery and that is usually carried out systematically with a division of labor. In a more limited sense, it denotes the fabrication or assembly of components into finished products on a fairly large scale.

manufacturing | Definition, Types, & Facts | Britannica

Technology has changed how we manufacture today. While the past required a very hands on approach for manufacturing, modern technology means most of the manufacturing is done through a computer screen. A person can input code into a computer program, take that code to the machine, and then have the machine read the code and output a product.
