The Chainsaw Operator's Manual is an essential safety tool for chainsaw operators. It is the ultimate guide to basic chainsaw operating techniques covering safety, maintenance and cross-cutting, but not tree felling. Detailed diagrams illustrate horizontal, vertical and boring cuts, as well as trimming and cross-cutting techniques. Safety considerations are discussed, including workplace safety, occupational hazards, kick-back and identifying dangerous trees. An explanation of the 'tension' and 'compression' forces in timber is also provided to help you understand where to begin cutting to avoid jamming the saw. The book covers chainsaw maintenance in detail, explains all aspects of the equipment and helps you select the right chainsaw and personal protection equipment for your needs. Trouble-shooting charts are included to help you solve operating problems. This manual has been updated to take into account the most recent changes in nationally accredited competency standards. It is a must-have for anyone operating a chainsaw.

Provides information on creating a variety of gadgets and controllers using Arduino.

Hundreds of tips, backed by more than 200 close-up, step-by-step photos and drawings. "A good starter volume."—Booklist. The Best Tool of the Millennium The seeds of Rybczynski's elegant and illuminating new book were sown by The New York Times, whose editors asked him to write an essay identifying "the best tool of the millennium." The award-winning author of Home, A Clearing in the Distance, and Now I Sit Me Down, Rybczynski once built a house using only hand tools. His intimate knowledge of the toolbox -- both its contents and its history -- serves him beautifully on his quest. One Good Turn is a story starring Archimedes, who invented the water screw and introduced the helix, and Leonardo, who sketched a machine for carving wood screws. It is a story of mechanical discovery and genius that takes readers from ancient Greece to car design in the age of American industry. Rybczynski writes an ode to the screw, without which there would be no telescope, no microscope -- in short, no enlightenment science. One of our finest cultural and architectural historians, Rybczynski renders a graceful, original, and engaging portrait of the tool that changed the course of civilization.

I have physical scars from past surgeries, however, I have emotional scars as well. They were buried deep inside (hidden). It wasn't until my mother died was I able to "catch my breath" and to make sense of or process the emotional pain I had endured due to her prescription drug addiction, resulting in my own addictions.

Thousands have been wounded in the wars in Iraq and Afghanistan. Five have survived quadruple amputee injuries. This is one soldier's story. Thousands of soldiers die every year to defend their country. United States Army Staff Sergeant Travis Mills was sure that he would become another statistic when, during his third tour of duty in Afghanistan, he was caught in an IED blast four days before his twenty-fifth birthday. Against the odds, he lived, but at a severe cost—Travis became one of only five soldiers from the wars in Afghanistan and Iraq to survive a quadruple amputation. Suddenly forced to reconcile with the fact that he no longer had arms or legs, Travis was faced with a future drastically different from the one he had imagined for himself. He would never again be able to lead his squad, stroke his fingers against his wife's cheek, or pick up his infant daughter. Travis struggled through the painful and anxious days of rehabilitation so that he could regain the strength to live his life to the fullest. With enormous willpower and endurance, the unconditional love of his family, and a generous amount of faith, Travis shocked everyone with his remarkable recovery. Even without limbs, he still swims, dances with his wife, rides mountain bikes, and drives his daughter to school. Travis inspires thousands every day with his remarkable journey. He doesn't want to be thought of as wounded. "I'm just a man with scars," he says, "living life to the fullest and best I know how."
