Trading the Betfair and sporting markets in-play is rapidly growing in popularity thanks to the increased sporting coverage available on many different satellite and cable channels. Many people start by just using Betfair to obtain better odds than those available at the traditional bookmakers. They then perhaps do a little more research and learn to trade the markets, but to make a regular profit a serious, disciplined and planned approach needs to be employed in order to not only win but keep on winning. 'Mastering Betfair' will take the reader through many of the low-risk strategies developed by the author over the past 3 years. The book also aims to highlight to the Betfair user the importance of employing disciplines - such as managing risk - that are normally associated with the financial markets, and indeed it is hoped that the book will also highlight to the financial trader the unique opportunities that are available on Betfair.

Tennis is the second biggest sport for in-play turnover in the betting markets. It offers fantastic potential for educated, professional traders to achieve high levels of profits. Mastering Tennis Trading gives you the tools to take a calm, strategic approach to tennis trading - in contrast to the emotional, impulsive trading style of many - and this will give you an edge in the markets. You will learn tennis trading strategies for the in-play markets on the online betting exchanges - the largest of which are Betfair and Betdaq. The strategies presented will open your eyes to the possibilities in the in-play tennis markets and help you to add statistically-proven techniques to your trading armoury. This will give you a professional, organised trading script and prevent you from taking a haphazard, impulsive and purely gambling trading approach. Strategies featured include: - Backing the favourite when losing - Backing the server - Laying bad servers - Tiebreak trading - At the end of the first set - The deciding set - And many more! Guidance is given on basic areas such as a trading set-up and how to avoid technological issues, through to more advanced subjects such as assessing which trading strategies work best and which entry points provide the best risk/reward ratios, as well as avoiding specific danger points which will help to eradicate costly losses. There are also statistics, compiled over many hours, that reveal high-odds trading opportunities. With the help of Dan Weston, you will be able to improve your tennis enough to earn you a part-time income, or to eventually allow you to turn full-time once you have gained enough experience. You'll soon be on course to master tennis trading.

How does coding change the way we think about architecture? This question opens up an important research perspective. In this book, Miro Roman and his AI Alice_ch3n81 develop a playful scenario in which they propose coding as the new literacy of information. They convey knowledge in the form of a project model that links the fields of architecture and information through two interwoven narrative strands in an "infinite flow" of real books. Focusing on the intersection of information technology and architectural formulation, the authors create an evolving intellectual reflection on digital architecture and computer science.

Can We Map Success? Successful people typically don't plan their success. Instead they develop a unique philosophy or attitude that works for them. They stumble across strategies which are shortcuts to success, and latch onto them. Events hand them opportunities they could not have anticipated. Often their peers with equal or greater talent fail while they succeed. It is too easy to attribute success to inherent, unstoppable genius. Bestselling author and serial entrepreneur Richard Koch charts a map of success, identifying the nine key attitudes and strategies can propel anyone to new heights of accomplishment: Self-belief Olympian Expectations Transforming Experiences One Breakthrough Achievement Make Your Own Trail Find and Drive Your Personal Vehicle Thrive on Setbacks Acquire Unique Intuition Distort Reality With this book, you can embark on a journey towards a new, unreasonably successful future.

Financial spread betting is a huge industry. But who wins and who loses at this game? What do the winners do that differs from the losers? That is what this book is about. Malcolm Pryor uses the model of climbing a mountain to explain a disciplined, winning approach to spread betting. First a base camp must be established. This includes getting set up with the right corporate data, charting and accounts software, deciding what to bet on and what your time frame should be, learning the nuances of operating an account, controlling risk, and learning from other people's mistakes. Many spread bettors don't even get this far. Next, we start climbing the mountain; this means having strategies that are right for us. The whole of this section is devoted to illustrating strategies which can be used for spread betting, for example trend following, counter-trend strategies and delta-neutral strategies such as pairs trading. Finally, we make our assault on the summit of the mountain. This is where the winners set themselves apart from the losers. Issues covered here include trade planning, record keeping, performance reviews, more on risk management, psychology and continual development. In this enhanced second edition, you also benefit from: - Refreshed and improved trading and risk management techniques, incorporating four additional years of spread betting experience and changes in the markets. - Brand new advice on managing exposure. - Updated analysis of spread betting firms' behaviour, order types and other practical issues. Spread betting is great fun; almost anyone can enjoy the odd bet now and again. But if you want to make money from spread betting then it must be taken seriously and a disciplined, tactical approach is required. This book is the essential guide to get to the top of the mountain.
