Compendium of Hydrogen Energy
Volume 4: Hydrogen Use, Safety and the Hydrogen Economy focuses on the uses of hydrogen. As many experts believe the hydrogen economy will, at some point, replace the fossil fuel economy as the primary source of the world's energy, this book investigates the uses of this energy, from transport, to stationary and portable applications, with final sections discussing the difficulties and possibilities of the widespread adoption of the hydrogen economy. Written by both leading academics in the fields of sustainable energy and experts from the world of industry Part of a very comprehensive

compendium which across four volumes looks at the entirety of the hydrogen energy economy Covers a wide array of hydrogen uses, and details safety tactics, hydrogen applications in transport, and the hydrogen economy as a whole

The main thrust of Part 1 is to give some understanding of the concept of 'global competition'. In doing so, the chapters rely heavily on industrial studies. Part 2 deals with two different aspects of this change viewed from two different perspectives. The one is economic and more macro: the other political and social and more micro, being concerned with the way in which companies have to utilize their various organisational units and integrate information on a fragmented environment into a strategic whole. Part 3 deals specifically with technology, as the particular segment of the environment

which often has the largest impact on future strategies. In Part 4 the perspective of global competition is applied at industry, country and company levels and it is shown that this perspective adds new dimensions to old problems. The final parts address the problem of management in global competition.

While many business schools are teaching Global Operations Strategy with self-made teaching materials, there are no such textbooks. Combining practical approaches with detailed theoretical underpinnings, this book provides theories, tools, frameworks, and techniques for global operations strategy, and brings real world perspectives to students and managers. Each chapter includes definition of key terms,

introduction of fundamental theories, several short case examples, one long new case to explain the associated theories, and recommended further reading.

Addresses central issues in the management of multinational and global corporations, an area of growing importance in the current age of restructuring, feverish competition, and political upheaval. Focuses on the dramatically different environment in which managers now function. Further, it examines the new and more sophisticated tools that will be needed in marketing, production, finance and control, and research and development in order to remain competitive. With 31 new readings written by a wide range of leading authors in the field, it contains indispensable advice for managers in the global setting.

This state-of-the-art Handbook provides a comprehensive understanding and assessment of the field of global supply chain management (GSCM). Editors John T. Mentzer, Matthew B. Myers, and Theodore P. Stank bring together a distinguished group of contributors to describe and critically examine the key perspectives guiding GSCM, taking stock of what we know (and do not know) about them.

Global service-based firms are often 'born global,' and these organizations have developed integrated global strategies based on industry relationships, in order to thrive in new environments. Focusing on these global strategies, this textbook explores the workings of modern service businesses, presenting theoretical management concepts alongside illustrative examples. Original case studies

strategic intent is included which brings out the differences between various elements of strategic intent. It also covers the current happenings in the businesses from the Indian context. Similarly, a topic on strategic choice has been discussed at length because of the fact that BCG growth-share matrix and GE nine-cell matrix are extremely useful in making a strategic decision in real life. Besides, the book contains ten case studies on various topics of strategic management such as environmental appraisal, critical success factors, SWOT analysis, strategic intent, strategic choice, business level strategy formulation and choice of growth strategy. All these cases are provided with authentic industry specific data. Firms are chosen from different businesses thereby giving business-specific flavour and a broad understanding of various business domains.
