Esteemed psychologist Daphne de Marneffe examines women’s desire to care for children in an updated reissue of her “fascinating analysis that’s a welcome addition to the dialogues about motherhood” (Publishers Weekly). If a century ago it was women’s sexual desires that were unspeakable, today it is the female desire to mother that has become taboo. One hundred years of Freud and feminism have liberated women to acknowledge and explore their sexual selves, as well as their public and personal ambitions. What has remained inhibited is women’s thinking about motherhood. Maternal Desire is the first book to treat women’s desire to mother as a legitimate focus of intellectual inquiry and personal exploration. Shedding new light on old debates, Daphne de Marneffe provides an emotional road map for mothers who work and mothers who are at home. De Marneffe both explores the enjoyment and anxieties of motherhood and offers mothers in all situations valuable ways to think through their self-doubts and connect to their capacity for pleasure. Drawing on a rich tradition of writers, such as Simone de Beauvoir, Adrienne Rich, Carol Gilligan, and Susan Faludi, as well as her experience as a psychologist and mother of three, de Marneffe illuminates how we express our desire to care for children. By treating maternal desire as a central feature of women’s identity—rather than as an inconvenient or slightly embarrassing detail—we can look with fresh insight at controversial issues, such as childcare, fertility, abortion, and the role of fathers. An “absorbing look at the enormous personal pleasure that women derive from mothering...Maternal Desire is a stirring book that celebrates women’s love for their children and mothering while also supporting their interest in careers and other pursuits” (Booklist).

Supermom is at the end of her rope. “Maternal Desire” shows mothers who work a full-time job and take care of their family that there is another way. The author explores maternal enjoyment as she does maternal anxiety, and offers not just understanding but the exhilaration of seeing a universal frustration discussed clearly for the first time.

Revolutionary and transforming, Maternal Desire is a book about ideas, a book about culture, and an invitation to self-reflection.”--BOOK JACKET.

This is an important and exciting addition to the debate about children, love and the inner life. Does identifying and talking about maternal desire feed old notions about women's nature and justify restrictions of their rights? Or is it an opportunity to understand women more deeply? Maternal Desire shows that the iconic images of motherhood - from the sacrificial mother to the supermom - and the endless debates about what's best for children, obscure the profound meaning of mothering - and the desire to mother. Here is a book that gives a common voice to mothers and examines motherhood as an active and transforming experience.

“Anyone grappling with the bewilderment of midlife...will be at once provoked and comforted by this enormously wise book” (Dani Shapiro, New York Times bestselling author of Hourglass: Time, Memory, Marriage), from a psychologist who has worked for decades with people struggling to preserve and enhance their marriages and long-term relationships. People today are trying to make their marriages work over longer lives than ever before. But staying married isn’t always easy. In the brilliant, transformative, and optimistic *The Rough Patch*, clinical psychologist Daphne de Marneffe explores the extraordinary pushes and pulls of midlife marriage, where our need to develop as individuals can strand headlong into the demands of our relationships. “A book of good intentions and helpful advice and a worthy manual for spouses” (Kirkus Reviews), *The Rough Patch* addresses common problems: money, alcohol and drugs, the stresses of parenthood, sex, extramarital affairs, lovesickness, health, aging, children leaving home, and dealing with elderly parents. Then, de Marneffe offers seasoned wisdom on these difficulties, explaining the psychological, emotional, and relational capacities we must cultivate to overcome them as individuals and as couples. Blending research, interviews, and clinical experience, de Marneffe dives deep into the workings of love and the structures of relationships. Intimate and always illuminating, *The Rough Patch* is an essential, compassionate resource for people trying to understand “where they are” on the continuum of marriage, giving them a chance to share in other people’s stories and struggles. “De Marneffe writes with poetry, wit, and compassion about the necessity of struggle in the quest for true love. Anyone in any relationship at any stage of life could stand to learn from the wisdom in these pages” (Andrew Solomon, National Book Award-winning author of *Far from the Tree*).

In a near-future Australia, no child lives in poverty and every child is safe. But at what cost? 19-year-old Monica never wanted a baby but the laws require her to give birth twice before she can move on with her life. Now that her first son, Oscar, has arrived she’s not so sure she wants to hand him over to be raised by professional parents: the Maters and Paters. When Monica turns to her birth mother, Alice, for help, she triggers a series of events that force Alice to confront her own dark past. Alice must decide - help her daughter break the law, or persuade her to accept her fate and do what’s best for the nation’s children? “Maternal Instinct is a thought-provoking read that’s also engrossing. Bowyer adds very real human reactions and emotions into a weird new world. This book is right up any dystopian-fan’s alley and will convert others.” *Aurealis Magazine* “If you liked *Vox*, you’ll love this... Amazing debut by Rebecca Bowyer.” Emily-Jane Clark, best-selling author of *Sleep is for the Weak*. “Fans of *The Handmaid’s Tale* will be instantly hooked... Maternal Instinct asks questions about humanity’s final destination if we continue down society’s current path of no real support for working parents.” Virginia Franken, author of *Life After Coffee* “It’s a cracking good read about upholding the rules, until time shows you that maybe the rules aren’t right in the first place. This is feminist dystopian fiction at its finest, set in a not-too-distant future that is not at all difficult to envisage. Settle in, because you won’t be putting it down any time soon!” Amy Wakley-Ahearn, *Handbagmafia* “A very well written novel, that I hope many people will enjoy...” ~ Ashleigh Meikle, *The Book Muse* “Something of a blend of *The Handmaid’s Tale* and 1984, this is a fantastic book. I was hooked early on and didn’t want to put this one down. I read it over the course of a family vacation and stayed up far too late at night because I NEEDED to know what was going to happen.” ~ Elle, *Erratic Project Junkie* “The story is amazing, it is unique. I’ve never ever read anything like this before.” ~ Anna S., *NetGalley* reviewer “Absolutely amazing book. Kept me hooked and wondering what was going to happen with an absolutely bitter sweet ending. I’d love to see a second book carrying on from this! 5 stars.” ~ Lauren H., *NetGalley* reviewer “This book has such an UNIQUE storyline... When I say I couldn’t put this book down, I mean I really couldn’t.” ~ Kade G., *NetGalley* reviewer “Dystopia at its finest! It gave me “Brave New World” vibes (my all time favourite) which made “Maternal Instinct” a very enjoyable read for me.” ~ Bettina M., *NetGalley* reviewer

Weaving together case histories with rich examples from literature and popular culture, Almond uncovers the roots of ambivalence, tells how it manifests in lives of women and their children, and describes a spectrum of maternal behaviour - from normal feelings to highly disturbed mothering.

Women who opt not to be mothers are frequently warned that they will regret their decision later in life, yet we rarely talk about the possibility that the opposite might also be true—that women who have children might regret it. Drawing on years of research interviewing women from a variety of socioeconomic, educational, and professional backgrounds, sociologist Orna Donath treats regret as a feminist issue: as regret marks the road not taken, we need to consider whether alternative paths for women currently are blocked off. She asks that we pay attention to what is forbidden by rules governing motherhood, time, and emotion, including the cultural assumption that motherhood is a “natural” role for women—for the sake of all women, not just those who regret becoming mothers. If we are disturbed by the idea that a woman might regret becoming a mother, Donath says, our response should not be to silence and shame these women; rather, we need to ask honest and difficult questions about how society pushes women into motherhood and why those who reconsider it are still seen as a danger to the status quo. Groundbreaking, thoughtful, and provocative, this is an especially needed book in our current political climate, as women’s reproductive rights continue to be at the forefront of national debates.

From the author of *How Should a Person Be?* (“one of the most talked-about books of the year”—*Time Magazine*) and the *New York Times* Bestseller *Women in Clothes* comes a daring novel about whether to have children. In *Motherhood*, Sheila Heti asks what is gained and what is lost when a woman becomes a mother, treating the most consequential decision of early adulthood with the candor, originality, and humor that have won Heti international acclaim and made *How Should a Person Be?* required reading for a generation. In her late thirties, when her friends are asking when they will become mothers, the narrator of Heti’s intimate and urgent novel considers whether she will do so at all. In a narrative spanning several years, casting among the influence of her peers, partner, and her duties to her forbearers, she struggles to make a wise and moral choice. After seeking guidance from philosophy, her body, mysticism, and chance, she discovers her answer much closer to home. *Motherhood* is a courageous, keenly felt, and starkly original novel that will surely spark lively conversations about womanhood, parenthood, and about how—and for whom—to live.
