War is an intense armed conflict between states, governments, societies, or paramilitary groups such as mercenaries, insurgents and militias. It is generally characterized by extreme violence, aggression, destruction, and mortality, using regular or irregular military forces. Warfare refers to the common activities and characteristics of types of war, or of wars in general.

War - Wikipedia

On the one hand, war had become an intractable social phenomenon, the elimination of which seemed to be an essential precondition for the survival of mankind. On the other hand, the use of war as an instrument of policy was calculated in an unprecedented manner by the nuclear superpowers, the United States and the Soviet Union. War also remained a stark but rational instrumentality in certain more limited conflicts, such as those between Israel and the Arab nations.
