Ocean Water

Chemistry

Online Library

Pearson

gases found in ocean water that are necessary for living things are oxygen and carbon dioxide. The surface of the ocean absorbs energy from the sun and heats up. Because warm water is less dense than cold water, the warm water stays on the surface. Surface water is warmest near the

Online Library

Pearson

equator and becomes colder as you travel away from the equator. Since cold water can hold more dissolved oxygen than warm water, there is more oxygen in polar waters
